

HAYDON

March 12, 2026

To Whom It May Concern:

Haydon Corporation has completed UL Environmental Product Declaration (EPD) certification for six core H-STRUT® Metal Framing profiles manufactured at its Stockton, California facility, providing project teams with independently verified cradle-to-gate environmental impact data for specification and procurement.

The UL EPD Certified Mark indicates that UL Solutions has independently reviewed and certified the manufacturer's environmental impact disclosure that constitutes the EPD.

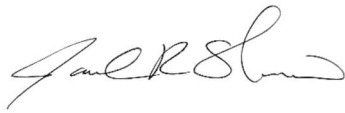

The certified declarations cover H-STRUT® profiles H-132, H-164, H-112, H-122, H-134, and H-172. Each EPD is facility-specific and reports cradle-to-gate environmental impact data in accordance with ISO 14025 and ISO 21930 standards.
