IEEPA Tariff Ruling – Haydon Position & Pricing Guidance

Dear Valued Customer,

We appreciate you reaching out regarding the recent U.S. Supreme Court ruling related to the International Emergency Economic Powers Act (IEEPA) and its potential impact on product pricing.

Haydon's core product categories, including metal framing and fittings typically classified under HS Code 7326.19, are not subject to IEEPA-related tariffs.

Our H-STRUT® metal framing solutions are manufactured in the United States using domestically sourced steel and are not subject to import tariffs. Select hardware and fitting products are sourced internationally and continue to be governed by existing Section 232 provisions, which remain unchanged.

As a result, this ruling does not impact current pricing, and we are not implementing any tariff-related adjustments tied to IEEPA.

We will continue to monitor regulatory developments, material costs, and market conditions. Should any changes to our cost structure arise, we will evaluate accordingly and communicate in a timely and transparent manner.

Thank you for your continued partnership.

Best regards,

Aaron Mooi
Head of Global Procurement
Haydon Corporation
