H-STRUT® Price Increase – Effective May 18, 2026

Dear Valued Customers,

At Haydon Corporation, we are proud to support your projects with the products you need when you need them, utilizing only domestically sourced, high-quality steel coils in our **H-STRUT® channel manufacturing**.

We remain committed to providing reliable supply, consistent product quality, and responsive service to support your business. In recent months, continued and persistent volatility in steel markets, along with sustained increases in manufacturing, freight increases due to fuel and tightened capacity, and pressures on operating costs, has created upward pressure across the industry.

As a result, Haydon will implement a price increase of **up to 15% on H-STRUT® Metal Framing products**, effective May 18, 2026, or as otherwise specified in your existing agreement.

Orders must be entered prior to May 18, 2026 to qualify for current pricing and are subject to product availability. All new orders entered after this time will be subject to updated pricing. Pre-existing quoted projects will be honored through their stated validity period. Advance buys may be limited to historic shipment averages and are subject to product availability.

We continue to invest in operational capabilities, domestic sourcing relationships, equipment, and logistics partnerships to ensure dependable service levels and long-term partnership value. These efforts are designed to support your growth while maintaining supply continuity in a dynamic market environment.

We appreciate your continued partnership and trust in Haydon. Please contact your Haydon representative with any questions.

Best regards,

Kate Schuster
Vice President, Commercial
Haydon Corporation
