

TECHNICAL DATA SHEET

Varn® Apollo 945AS

KS15-008

**Description:**

Varn® Apollo 945AS silicone web conditioner offers unrivaled flexibility to heatset web printers. It is loaded with enhanced anti-static package and remains stable in high temperatures. Designed to maximize performance on Goss' post-oven Ecocool® web moistening system, Varn® Apollo 945AS provides excellent protection against marking, improves the finished product by balancing lubrication and wetting.

Application:

- Start at 4 ounces of product per gallon water to prevent streaking and marking, and to eliminate static problems. Add additional product one ounce at a time per gallon for difficult marking or static problems.

Key Features:

- Predictable results at reduced dosages.
- No limits on speed.
- Versatile performance allows for use in all delivery systems — sheeter, folder, inline and all stacking equipment.
- Enhanced anti-static properties.
- Maximum stability on press.

**Storage:**

- The product should be processed within 12 months after production date.
- To prolong the shelf life, we recommend storing the product in its original, un-opened packaging at room temperature (68 -78 °F), as correct storage conditions are essential.

Quality / Environment / Health & Safety

Flint Group maintains a comprehensive Management System that integrates quality, environment, health & safety. Our production and quality control processes meet high industry standards, ensuring product safety and reliability. When used as intended, our products are safe and pose no hazards under normal conditions. For more details, refer to the Safety Data Sheet.

Handling precautions – skin sensitization

Ensure the use of proper protective equipment when handling chemicals. For detailed guidance, refer to the Safety Data Sheet and consult with your PPE (Personal Protective Equipment) provider.

Additional Information

Please contact your local Flint Group Customer/Technical Service if further information is required.
