

Novaspot[®] GLOBAL FAST "C" BIO Novaspot[®] GLOBAL FAST "U" BIO

The duct-fresh spot colour ink series with increased fastness properties based on digital PANTONE® colour values

Spot colour ink series for sheetfed offset

Product features

- Novaspot® GLOBAL FAST BIO is a ready-to-print, duct-fresh spot colour ink series, based on renewable raw
 materials with enlarged fastness properties. It is matched on the basis of the digital PANTONE® colour values and
 is therefore independent of production-related unavoidable colour tone differences from fan edition to fan
 edition. The series includes all PANTONE® colour shades and is constantly being expanded to include new shades
 of new editions. Novaspot® GLOBAL FAST BIO spot inks are alcohol-, solvent mixture- and alkali-fast. The series is
 available as Novaspot® GLOBAL FAST "C" BIO for coated papers and as Novaspot® GLOBAL FAST "U" BIO for
 uncoated papers.
- Due to the specific fastness properties of the series the spot inks are perfectly suited for subsequently print finishing – for detailed information to that please consider the leaflet "Resistance of offset inks required for surface finishing" from the German association of printing ink industry or our Technical review of the same name.
- The series is excellently suited both for printing presses of the latest generation and printing machines of older designs and construction.
- The benefits of Novaspot[®] GLOBAL PLUS BIO are high brilliance, very good ink/water balance, good ink setting properties and as a result, rapid further processing with a good behaviour in the pile and very high rub resistance.

Advantages of Novaspot[®] GLOBAL FAST BIO

- Ready-to-print spot colour inks with enlarged fastness properties.
- Colour tones correspond to digital PANTONE® colour values.
- Available for coated and uncoated papers.
- Optimal wetting of the pigment through BIO-binders.
- Very high rub resistance.
- Very good ink/water balance.

Substrates	Optimally suited for gloss coated and uncoated paper and board and well suited for matt coated paper. For the matching of the series Novaspot® GLOBAL FAST "C" BIO the gloss coated paper Maxigloss 135 g/m ² was used, the matching of Novaspot® GLOBAL FAST "U" BIO series is based on the uncoated paper Maxioffest 100g/m ² . The same ink formulations are used for coated and uncoated papers in the PANTONE® formula guide. The uncoated printing paper used in the PANTONE PLUS book shows considerable deviations from European papers. For the shades in the PANTONE PLUS uncoated book, particularly in light colours, different formulations for matchings on coated and uncoated paper arise. Nevertheless, the great diversity in uncoated materials on the market can cause wide colour variation. We therefore recommend, if the best possible match to the PANTONE® colour guide is required on widely diverse substrates, individual shades should be matched on the customers' owr paper.													
Remarks	To ac	The basis for the matching of this series are the digital PANTONE® colour values. To achieve the specific fastness properties of the series particular, fast colour pigments are used. Caused by that, colour variations from the PANTONE® formula guide are possible and technically inevitable.												
Exceptions	Not f	or use on food packa	ging wit	hout fu	nctiona	I barrie	er.							

More products. Streamlined access. Greater results.

Flint Group offers a uniquely powerful combination of products, services and expertise; giving you access to the industry's broadest range of pressroom products.

Inks & Coatings. Pressroom Chemicals. Blankets. Sleeves. Consumables.

Rely on us for consistency, reliability and customer focus. Our aim is to make it easier for you to achieve your business goals. With Flint Group products in your pressroom, you can run your business with confidence and peace of mind.

You are welcome to contact us for further information.

The aim of our technical documents is to inform and advise our customers. The information provided herein is correct to the best of Flint Group's knowledge. No liability for any errors, facts or opinions is accepted. Customers must satisfy themselves as to the suitability of this product for their application.
