

# Varn® Compound 747

Lithographic ink additive

**Speciality product for all printing applications and press types**

## Product Features

- Varn® Compound 747 is an ink additive formulated to prevent 'ink set-off' and keep reverses and half-tones open and clean. It permits large solids and denser colours to be run and backed up immediately, saving time and space.
- Varn® Compound 747 reduces tack, improves ink lay on all types of stock and prevents sheets from sticking to blankets. It mixes easily with ink, making it more workable and reducing the volume of ink required.
- Varn® Compound 747 reduces picking and ink crystallisation and is ideal for multi-colour work.
- Varn® Compound 747 makes the ink/water balance easier to control as less water is needed to maintain balance in offset printing, so that good offset and letterpress inks run better.

## Advantages of Varn® Compound 747

- Reduces tack.
- Improved ink lay on all stocks.
- Reduced waste.
- Enhances ink drying.
- Sharper vignettes/halftones.

# Varn® Compound 747

Features	Advantages	Benefits
<ul style="list-style-type: none"><li>• Formulated to optimise ink rheology.</li></ul>	<ul style="list-style-type: none"><li>• Aids production of a stable ink/water balance.</li></ul>	<ul style="list-style-type: none"><li>• Improved print quality.</li><li>• Provides more latitude for the printer.</li></ul>
<ul style="list-style-type: none"><li>• Reduces ink tack.</li></ul>	<ul style="list-style-type: none"><li>• Reduces risk of wraparound during start-up, particularly with foil board.</li></ul>	<ul style="list-style-type: none"><li>• Reduced waste.</li></ul>
<ul style="list-style-type: none"><li>• Reduces ink drying time.</li></ul>	<ul style="list-style-type: none"><li>• Prevents ink set-off.</li></ul>	<ul style="list-style-type: none"><li>• Faster turnaround.</li></ul>

**Product code**

KU40-0C7G-01AF.

**Pack size**

1 litre.

**Application**

Shake well before use.

Offset inks: Mix 140g Varn® Compound 747 per kilo ink. Add more if necessary, depending upon the consistency of the ink.

Gloss inks, metallic inks, overprint varnishes: Mix 140g to 280g Varn® Compound 747 per kilo ink, adjust as required.

Not for use on food packaging without functional barrier.

**More products. Streamlined access. Greater results.**

Flint Group's Print Media division offers a uniquely powerful combination of products, services and expertise; giving you access to the industry's broadest range of pressroom products.

**Inks and Coatings. Pressroom Chemicals. Blankets. Sleeves. Consumables.**
