

TECHNICAL DATA SHEET

Varn® Enviroflex Solwash KV60-0UH

**Description:**

Enviroflex Solwash represents the ultimate in flexographic and gravure press cleaning for solvent based inks and coatings. It is a blend of extremely powerful ink removing solvents specially formulated for the easy removal of solvent based inks and coatings. This product is designed to thoroughly deep clean and rejuvenate anilox rollers either on or off the press, optimising anilox roller life and press performance. It is recommended for use undiluted as part of a weekly or monthly deep cleaning schedule and rejuvenation of anilox rollers on or off press.

Application:

- Apply un-diluted with a sponge, cloth, brush, pad or sprayer and allow to remain for a few minutes.
- Scrub the affected area (the Varn® Enviroflex Pad is recommended for optimum performance).
- Wipe away any residue and flush the surface with water or remove with a clean cloth.
- Varn® Enviroflex Solwash can be pumped or circulated through entire ink metering systems.
- For optimum performance, use in conjunction with the Varn® Enviroflex Pad.

Key Features:

- Very strong solvency.
- Effective removal of solvent inks and coatings.
- Suitable for regular deep and thorough cleaning maintenance applications.
- Non corrosive.
- Safe pH level (pH 9).
- High flashpoint (56°C) All.
- Environmentally compliant and fully biodegradable.

Certifications:

- ISEGA certified for safe use in the printing process of food packaging materials.

TECHNICAL DATA SHEET

Varn® Enviroflex Solwash
KV60-0UH**Limitations:**

- Flash Point 56°C (All)

The final product/packaging structure and complete packaging must be tested and approved according to the intended application by the printer/packer. If your application covers any of the above, or other non-standard applications, please consult your local Flint Group technical support for guidance.

Storage:

- The products should be processed within 12 months after production date.
- To prolong the shelf life of the product, we recommend storage in its original, un-opened packaging at room temperature (20 - 25°C), as correct storage conditions are essential.

Quality / Environment / Health & Safety

Flint Group maintains a comprehensive Management System that integrates quality, environment, health & safety. Our production and quality control processes meet high industry standards, ensuring product safety and reliability. When used as intended, our products are safe and pose no hazards under normal conditions. For more details, refer to the Safety Data Sheet.

Handling precautions – skin sensitization

Ensure the use of proper protective equipment when handling chemicals. For detailed guidance, refer to the Safety Data Sheet and consult with your PPE (Personal Protective Equipment) provider.

Additional Information

Please contact your local Flint Group Customer/Technical Service if further information is required.
