

TECHNICAL DATA SHEET

Varn® Antistatic Solution KU40-5AS

**Description:**

Concentrated anti-static additive for use with silicone emulsions.

An effective conditioning fluid formulated to enhance the performance of silicone solutions used for paper treatment in the Heatset Web market.

Suitable for all types of presses and dramatically improves press performance by eliminating the problems attributed to static build-up on folders and sheeters.

For optimum performance the product should be used at 1-4% dilution in conjunction with a silicone solution.

Application:

- Recommended dosage: Between 1.00 % and 4.00 % concentration, in the mixed silicone.

Key Features:

- Eliminates static on difficult substrates.
- Minimises folder jams.
- Increases productivity.
- Non-hazardous.
- Improves silicone emulsion wetting characteristics.
