dayGraphica® 36

Excellent print quality combined with durability

Suitable for all Sheetfed presses

Product Features

- The dayGraphica® 36 is the ideal blanket for high usage applications and where controlling costs are a major factor.
- High solvent resistance and optimised surface finish ensure high quality reproduction across a wide range of substrates. The thicker compressible layer ensures uniform print pressure in a wide range of press configurations and across all format sizes.
- The enhanced fabric carcass construction ensures that the dayGraphica® 36 survives all but the worst cases of smash damage. The ability to recover from severe over pressure situations means fewer stops for blanket changes and reduced downtime costs further enhances this product's value for money status.

Advantages of dayGraphica® 36

- Durable, high density carcass.
- Excellent rebound characteristics.
