

TECHNICAL DATA SHEET

Varn® MAJESTA 738

KT15-026

**Description:**

Varn® MAJESTA 738 is an acid gum heatset fountain solution designed for high speed printing. It is equipped with a strong anti-piling package to ensure excellent performance on difficult stocks such as the high recycled content paper stocks.

Application:

- Recommended dosages: Use 5-8 ounces per gallon of water (depending on equipment and requirements). Increase product by ½ ounce per gallon as needed to achieve desired print quality.
- For best results start with a clean dampening system.

Key Features:

- Reduces piling and reduces the need for extra additives to fight piling through a robust lubrication package
- Clean running slips and dampener rollers
- Versatile to run with various dampening systems and ink sets
- Improved quality on difficult uncoated paper stocks
- Improved re-starts after wash cycles and downtime
- Wide ink and water window

**Storage:**

- The product should be processed within 12 months after production date.
- To prolong the shelf life, we recommend storing the product in its original, un-opened packaging at room temperature (68 -78 °F), as correct storage conditions are essential.

Quality / Environment / Health & Safety

Flint Group maintains a comprehensive Management System that integrates quality, environment, health & safety. Our production and quality control processes meet high industry standards, ensuring product safety and reliability. When used as intended, our products are safe and pose no hazards under normal conditions. For more details, refer to the Safety Data Sheet.

Handling precautions – skin sensitization

Ensure the use of proper protective equipment when handling chemicals. For detailed guidance, refer to the Safety Data Sheet and consult with your PPE (Personal Protective Equipment) provider.

Additional Information

Please contact your local Flint Group Customer/Technical Service if further information is required.
