Technology Designed to Complement & Enhance

TriaCode

AQUACode

Water-based metallic & specialty inks and additives designed to boost print results in Paper & Board applications.

Designed to complement and enhance, Flint Group Packaging Solutions' TriaCode offers unique options that either complement Paper & Board applications or enhance the packaging printing process.

To complement water-based paper and board printing, Flint Group Packaging Solutions offers a range of metallic inks in various shades. The use of these specialty inks can boost your print, providing unique selling attributes with an enhanced appearance.

To elevate your printing process or to enhance your print results, the TriaCode range offers specialty additives that can be used to achieve specific properites related to various conditions and requirements.

Based on carefully selected materials, the TriaCode range encompasses a wide palette of products designed to enhance the water-based paper and board printing process and printed package.

With excellent product quality and performance characteristics, we are pushing the boundaries of what is possible with innovative technology.

Power up your Print!

- **Water-based metallic inks:** Silver, Gold and Pearl offerings for a wide variety of substrates.
- **Additives:** For defoaming, scuff & rub resistance, trapping and retarding attributes.
- **Specialty:** A laser writable white ink for bar codes and markings.

Think Global!

- A global product reinforced by a global team, infused with local experts and focused support.
- Global food packaging and regulatory compliance.
- Simplify the wide world of print with a global, consolidated, ink system.

Dream Green!

- Chemistry designed with an environmental focus - suitable for the circular packaging economy.
- Free of harmful mineral oils and solvents - designed for safe handling.
- Designed for printing safe end products.
- A product series which supports Flint Group Packaging Solutions sustainability platform.
