## Technology Designed to Protect & Promote!

**A wide range of water-based coatings customized for various applications. Built for performance and protection!**

Designed to protect and promote – Flint Group's DecaCode coatings provide enhanced performance in gloss, friction, barrier and other enriched properties. A product range developed to excel on a wide variety of paper packaging substrates.

Flint Group's water-based coating range has been carefully selected for the package printing industry, with excellent product quality and performance characteristics.

Pushing the boundaries of what is possible with innovative technology delivered today and ready for the future!

### Suitable for a wide variety of applications:

- Corrugated pre- and post-print, including lightweight liners
- Industrial paper sacks and dry food bags
- Paper shopping bags
- Food Service (Cups & Plates, Food Wraps, Cartons)
- Non-food wraps

### Think Global!

- A global product range reinforced by a global team, infused with local experts and focused support
- Global Food Packaging and regulatory compliance
- Simplify the wide world of print with a global, consolidated product range

### Power up your Print Job!

- Gloss Coatings: Fast drying; excellent rub resistance; providing a variety of gloss levels
- Friction Coatings: Excellent friction, rub resistance and wet block; high printing speed
- Heat resistant coatings: High heat and scuff resistance; fast drying; great mechanical resistance
- Barrier Coatings: Shielding against water, fat and other materials; direct food contact and high gloss options available; for coated and uncoated substrates
- Primers, heat seal coatings and UV coatings
- Specialty Coatings: For soft touch feel; matte appearance; pearlescent effects. A range of specialty coatings are available – contact your sales or technical Flint Group representative to learn more!
