

Technology Designed to Perform!

A water-based ink technology that increases productivity and reduces total cost to print.

Designed to perform, the HexaCode series is a powerful technology platform that improves print quality and reduces overall packaging costs. A product range developed to excel on a wide range of paper packaging substrates.

Experience a low maintenance water-based ink system that delivers on reducing waste while maintaining industry leading print quality. The HexaCode series is built on a Swiss Ordinance raw material platform. This unique product range offers class leading product safety.

Suitable for a wide variety of applications:

- Corrugated post-print, including lightweight liners
- Industrial paper sacks and dry food bags
- Paper shopping bags
- Non food wraps

Power up your Colours!

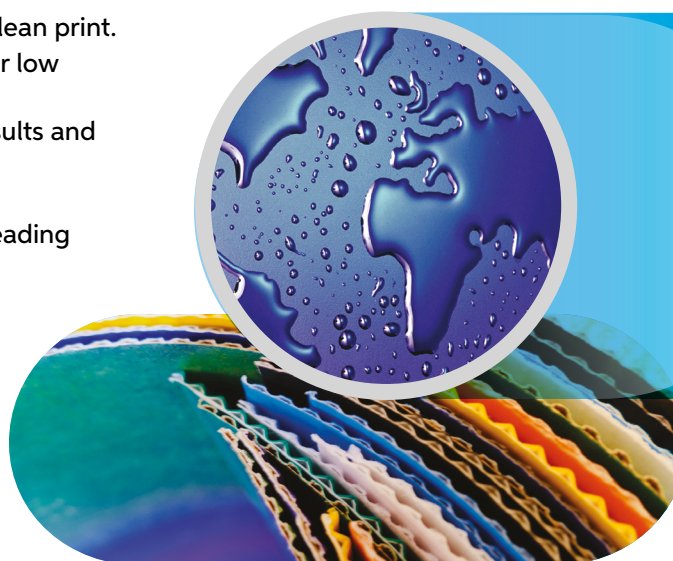

- Excellent product performance for in-line die cutting applications.
- Provides excellent re-solubility and clean print.
- Excellent pH and viscosity stability for low press side ink maintenance.
- Delivers outstanding print quality results and supports extended colour gamut.
- Excellent shelf life of press returns.
- Meets and exceeds current market leading print speeds.

Think Global!

- A global product reinforced by a global team, infused with local experts and focused support.
- Global food packaging and regulatory compliance.
- Simplify the wide world of print with a global, consolidated, ink system.

Dream Green!

- Chemistry designed with an environmental focus - suitable for the circular packaging economy.
- Free of harmful mineral oils and solvents - designed for safe handling.
- Designed for printing safe end products.
- A product series which supports Flint Group's sustainability platform.

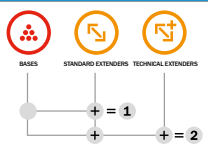

Core Applications

 HexaCode Board	Water-based ink developed and optimised for printing with excellent performance on corrugated post-print.
 HexaCode Bag	Water-based ink developed and optimised for high speed printing on dry food bags and industrial paper sacks.
 HexaCode Retail	Water-based ink developed and optimised for excellent print performance on retail shopping bags.
 HexaCode Wrap	Water-based ink developed and optimised for high speed printing on non food wraps.

Building Block Technology:

HexaCode is available with our Building Block Technology designed for your flexibility and efficiency.

	Available with our Building Block Technology designed for your flexibility and efficiency!
	<p>1 Standard Ink: Economical, standard artwork providing regular properties</p> <p>2 Performance Ink: High quality graphics providing specific performance</p>

A wide range of additives, specialities and coatings designed for enhanced performance or special effects	
 ADDITIVES  SPECIALITIES  COATINGS	<p>TriaCode Additives: As needed, additives used to achieve specific properties related to various conditions and requirements.</p> <p>TriaCode Specialities: Unique selling appearance and effects like metallic, fluorescent and special functionalities.</p> <p>DecaCode Coatings: Coatings for protection, enhanced performance, printing speed, gloss, friction, barrier and other required properties.</p>

We bring **colour** to the world
