CONSIGNMENT USAGE REPORTING
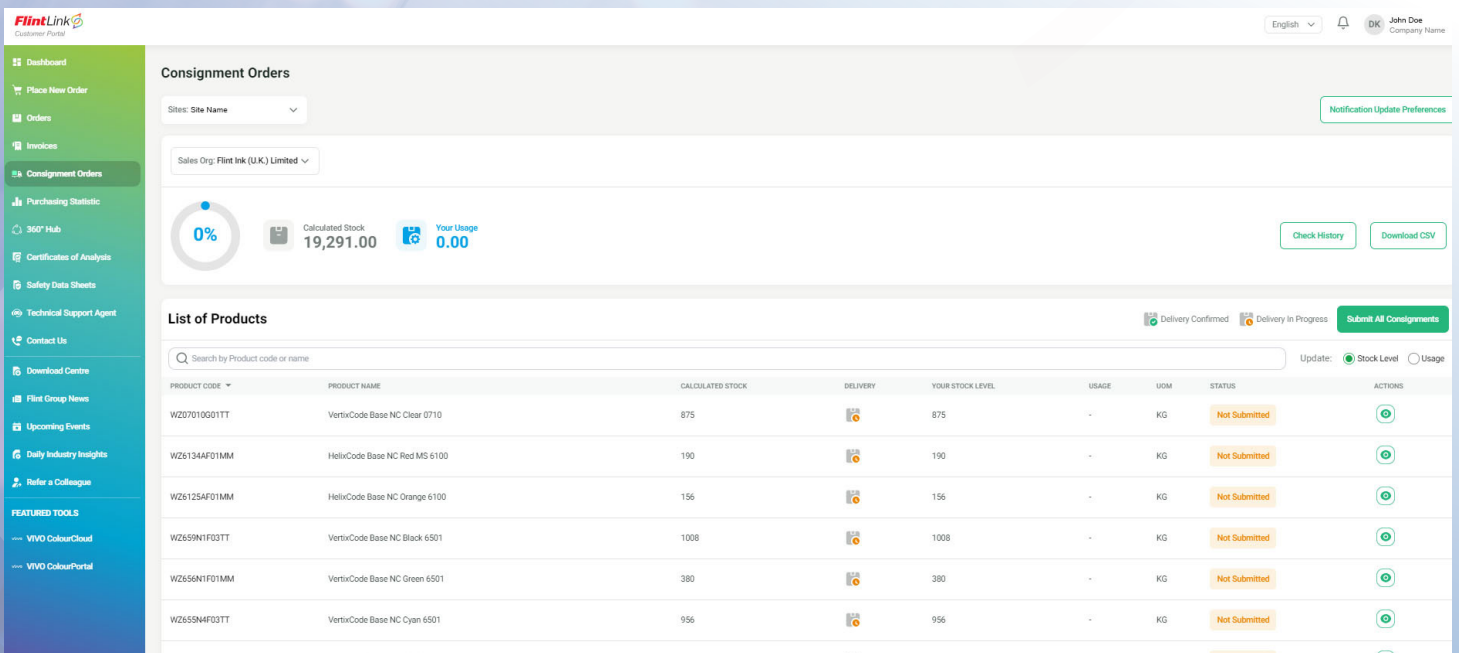

Flint Group's **consignment feature** within its FlintLink B2B portal is designed to increase efficiencies, streamline processes, and remove the need for various spreadsheets and email communications.

FlintLink's consignment feature allows customers to seamlessly verify their shipments, report their consignment usage and submit to Flint Group. After submitting, Flint Group's system sends a replenishment request to our customer care team. Upon confirmation by your customer care specialist, a new order and invoice are promptly generated.

Easy to use interface!

- Log into FlintLink
- Enter the 'Consignment Orders' module
- Verify your shipments
- Enter usage for each product and submit

Our team will do the rest!

ATTRIBUTES & BENEFITS

FlintLink gives you digital access to critical information when and where you need it.

Press Performance — Customers engaged with our 360°ServiceCode programme have direct access to our 360°Hub to review performance metrics such as waste reduction or increased uptime.
