

Designed for Sustainable Packaging Solutions!

Water-based ink technology for Paper & Board which has been developed using sustainable resources.

Flint Group's natural TerraCode series provides a sustainable solution for printers' and brand owners' environmental and sustainable projects for the Paper & Board markets. TerraCode is available in two levels of sustainable chemistries suited for printers' specific needs.

With TerraCode, Flint Group demonstrates its commitment to a sustainable future while maintaining the print quality and packaging performance expected from a Flint Group product.

The TerraCode series is built on a Swiss Ordinance raw material platform. This unique product range offers class leading product safety.

Suitable for a wide variety of applications:

- All Paper & Board applications
- High water and grease resistant version available for the food service market.
- Range includes high performance and direct food contact coatings.

Power up your Colours!

- Excellent mechanical resistance (i.e. for in-line die cutting applications).
- Provides excellent resolubility and clean print.
- Excellent pH and viscosity stability for low press side ink maintenance.
- Delivers outstanding print quality results - perfect for expanded colour gamut printing.
- Excellent shelf life of press returns.
- Meets and exceeds current market leading print speeds.

Think Global!

- A global product reinforced by a global team, infused with local experts and focused support.
- Global Food Packaging and regulatory compliance.
- Simplify the wide world of print with a global, consolidated, ink system.

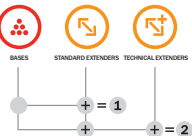

Dream Green!

- Chemistry designed with an environmental focus - suitable for the circular packaging economy.
- Free of harmful mineral oils and solvents - designed for safe handling.
- A product series which supports Flint Group's sustainability platform.
- Sustainable pigment solutions, resins, additives and biomass balance materials which do not compete with food resources or contribute to deforestation.

Building Block Technology:

TerraCode is available with our Building Block Technology designed for your flexibility and efficiency.

	Available with our Building Block Technology designed for your flexibility and efficiency!
	<p>1 Standard Ink: Economical, standard artwork providing regular properties</p> <p>2 Performance Ink: High quality graphics providing specific performance</p>

Variations available:

TerraCode is available in two technology variations and a C2C solution, designed for your flexibility and efficiency.

A product series based on sustainable raw materials. System offers excellent print performance and resistance properties comparable to existing synthetic solutions.

Biomass Balance technology offers the same performance as conventional acrylic systems and offers a high renewable content.

C2C Certified® for Material Health at the Silver/Bronze level by the Cradle to Cradle Products Innovation Institute.
