

# Pharmaceuticals drive up to 33% of Medicare Advantage plan spend

Reduce costs for Medicaid and Medicare populations with Arcadia's Polypharmacy Dashboards.

Medication management for complex patients is complicated by nature: stacks of scripts call for intense oversight to keep patients safe. This problem is especially expensive for healthcare systems that work with dual-eligibility populations.

The data paints a detailed picture: almost half (47%) of Medicare ACO members are on 7+ drugs, and specialty drugs drive 33% of Medicare Advantage plan spend and 56% of commercial pharmacy spend. Further, these members can be difficult to identify.

The solution? Ascend beyond medication lists to a brand new Vista with Arcadia's suite of polypharmacy dashboards.

## Lower pharmaceutical costs and deliver better care to members

### Pharmacy overview and explorer

- Pharmacy trends and spend
- Price per script and utilization
- Provider prescribing patterns

### Specialty pharmacy

- Specialty pharmaceuticals spend
- High cost drugs
- Frequent prescribers

### Polypharmacy

- Reconcile medications
- Reduce volume of prescriptions
- Identify harmful drug combinations and drug cascades

### Opioids

- Identify opioid prescription trends at the member and provider level
- Resolve dangerous prescription combinations

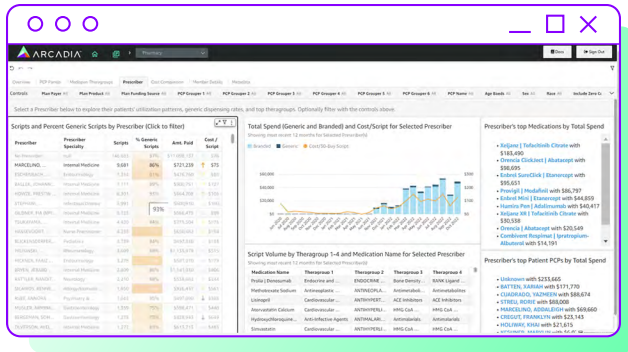

### Medical pharmacy (Part B drugs)

- Learn what medicines are driving expenses
- Monitor drug cost trends
- Identify alternative sites of service

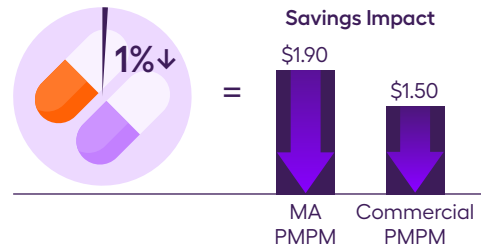

## Polypharmacy dashboards that streamline and simplify

Multiple medication cascades can lead to high costs (or worse) — it's time to streamline the process of finding impacted patients, simplify care management teams' processes, and prevent unnecessary overmedication.

Arcadia's Vista Polypharmacy Dashboards transform this complicated issue into a straightforward process, reducing pharmaceutical costs and identifying patients on drug cascades that could be simplified. Conserve resources, boost adherence, and enable happier, healthier days.

A 1% decrease in medication utilization can impact Medicare Advantage savings by \$1.90 PMPM, and \$1.50 PMPM in commercial population.
