

Arcadia Research Collaborative (ARC)

Accelerating Research. Advancing Care. Powering the Future of Healthcare AI.

The Arcadia Research Collaborative (ARC) brings together leading health systems, payers, and life sciences organizations to accelerate clinical research, expand access to funding, and responsibly advance healthcare AI.

Leveraging Arcadia's industry-leading population health and analytics platform, ARC is a research enablement network that turns real-world data into impact — for patients, providers, and payers alike.

Why Join the Arcadia Research Collaborative

1. Advance Clinical Research

Support our shared mission to make care better for all. ARC helps members fill trials faster, identify new trial opportunities based on high match rates, and connect directly with sponsors seeking high-performing sites.

2. Access More Grant Funding & Publications

Leverage Arcadia's research-grade, multi-source dataset to support grant applications, benchmarking, and publication. Members have already used Arcadia-derived insights to secure over \$10M in research funding and citations in leading journals.

3. Unlock Economic and AI Innovation Value

Participation in funded research or trial enablement projects earns credits toward Arcadia fees — directly rewarding engagement. Members also gain access to a massive, validated data set ideal for training, testing, and validating AI models that are representative, trustworthy, and ready for real-world deployment.

4. Collaborate Across the Ecosystem

ARC is a neutral space for payers, providers, and life sciences partners to co-develop research, share learnings, and advance equitable, evidence-based AI innovation together. By combining diverse perspectives and data, members help shape the standards for the next generation of healthcare intelligence.

Founding Membership

Participation in ARC is **exclusive and initially limited to 10 members**, representing the nation's most innovative **health systems, payers, and research organizations**.

This inaugural cohort will lay the foundation for a scalable, sustainable network that advances healthcare intelligence across the entire continuum of care.

Exclusive Founding Member Benefits

Win Together - Economic Partnership & Shared Value

A transparent contribution-based model rewards engagement and innovation through credits, funding support, and analytic resources tied to measurable impact.

Strategic Co-Development Role

Founding members partner directly with Arcadia's data science and product teams to guide platform evolution, feature design, and research priorities.

Multi-Sector Collaboration Opportunities

ARC brings together payers, providers, and researchers in a trusted environment that fosters joint studies, shared best practices, and innovative care models.

Early Access to Data & Advanced Analytics

Members gain priority access to Arcadia's research-ready environment — including de-identified data, and trial enablement capabilities spanning clinical and claims data.

What's Next?

The Arcadia Research Collaborative unites healthcare leaders across the provider, payer, and research ecosystem to create a powerful cycle of shared insight and mutual benefit.

By contributing to, and learning from, the collective intelligence of the network, members amplify innovation, accelerate evidence generation, and achieve measurable clinical and financial outcomes.

Together, we're not just joining a network - **we're building it.**
