

## Build High-Performing Networks and Compare Existing Network Performance Against Competitors

Gain a complete view of healthcare patterns in your area with Arcadia's Network Modeler. Designed for payers and providers looking to optimize their networks or enter a new market — this solution allows you to analyze trends while identifying challenges, opportunities, and top performers. With Network Modeler, draw on 200 million Medicare, Medicaid, and Commercial lives to see provider density by county and service line. Then, use aggregated metrics to design high-performing networks. Close care gaps, reduce contract costs, increase fee-for-service revenue, and stay ahead of the competition.

### Features

Leverage an extensive dataset of 200 million Medicare, Medicaid, and commercial lives

Dive into regional data and view detailed information on income, education, and demographics

Access detailed information on specialists, PCPs, and facilities in a particular geographic area

### Benefits

Design high-performing networks and optimal coverage with aggregated metrics on quality, cost, and more

Gain a competitive edge by comparing your network's performance against the competition

Streamline referrals by driving real-time in-EHR provider recommendations

Top payers and healthcare providers trust Arcadia to deliver insights where they matter most.
