# Ditch Subpar Data Analytics

Upgrade to a data platform built on decades of experience

Not all healthcare data platforms are created equal. An incomplete view of your patients and business has a real cost, whether that's buried insights or money left on the table. Integrate across multiple EHRs, influence providers at the point of care, and innovate quickly on a platform that fits seamlessly within your tech stack.
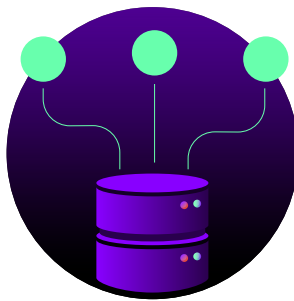

Embrace the cutting edge of healthcare technology

Unify disparate data sources and power AI models, reports, and dashboards — all on one platform. Leverage a scalable data ecosystem to meet your business and healthcare goals. Upgrade to a platform designed for innovation, so you can tackle the complexities of healthcare.

RUSH HEALTH

Your ally in actionable data

Success starts with an enterprise healthcare data asset and a trusted partner. With round-the-clock support, Arcadia offers a robust data architecture that grows alongside our partner organizations.

Arcadia has empowered customers to achieve:

81%
In-visit diagnosis capture

59%
More closed risk per patient

24%
Reduction in inpatient admissions

$8K
Reduction post-discharge

4 days
Reduction in post-acute ALOS

22%
Higher MSSP bonuses

"We talked extensively with Arcadia customers, and Arcadia Analytics blew our previous platform out of the water. That was the main reason we ended up with Arcadia Analytics. The platform also had AI, which a lot of other platforms did not have. The other thing we noticed was that Arcadia Analytics' user interface was much more user friendly than other user interfaces we saw. We also had multiple EHR systems that we wanted to integrate, and Arcadia Analytics can be installed on anyone's system."

—Manager, August 2022
