

Empower care teams with impact scores that supercharge patient stratification

Leverage Arcadia's proprietary algorithm to infuse clinical workflows with AI-enhanced insights. Our Complex Care Management (CCM) Score enables care teams to make an impact by minimizing time spent on admin, quickly surfacing patients that should be prioritized for outreach. The results? Less clicking. Happier care teams. And enhanced outcomes that support organizational goals.

Reduce ED visits and lower unplanned admissions

Unnecessary emergency department visits are both common and costly. Leverage Arcadia's CCM Impact Score suite to enroll great candidates in care management programs, avoiding preventable illness.

Sharpen insights beyond a cohort builder

With insights into SDoH, utilization, and other factors, the CCM Impact Score shows the relative value of the change in outcomes for patients enrolled.

Establish an efficient, impactful care team

Equip care teams with sophisticated, user-friendly technology. After choosing a focus group (which may include combinations of high risk, rising risk, chronic conditions, or high utilizers), stratified patients are presented to care teams. No more manual searching to identify and prioritize the day's outreach.
