

Revolving risk

A risk profile of 42,705 patients across 166,440 visits

John Doe was seen **54** times by **7** different clinicians throughout the year. In most encounters, providers did not document known risk, however **by Oct 100%** of John's risk was coded.

Victor Hickory was seen **20** times by **5** different clinicians throughout the year. Those clinicians steadily documented Victor's risk in Q1, and maintained **documentation rates of 97%**.

Jane Smith was seen **35** times by **5** different clinicians throughout the year. Those clinicians slowly improved Jane's documented risk profile, but never got more than **70% complete**.
