

Arcadia Vista: Business Intelligence for Healthcare

Success in the dynamic world of healthcare requires an in-depth and shared understanding of performance across a complex organization. Business intelligence tools retrofitted for healthcare force data analysts to build bespoke and ad hoc reports for executives expecting to make critical decisions. Without a data model and reporting designed for the nuances of healthcare, trends can be missed, misunderstood across the organization, or discovered too late to influence change.

Arcadia Vista makes data more accessible by providing self-service dashboards — built in partnership with value-based care pioneers — to turn insights into enterprise-wide performance, faster.

Analysts and leaders interact with Arcadia Vista's growing library of healthcare intelligence dashboards — built on top of a data platform purpose-built for value-based care — to help data-driven leaders understand holistic performance and fine-grain detail.

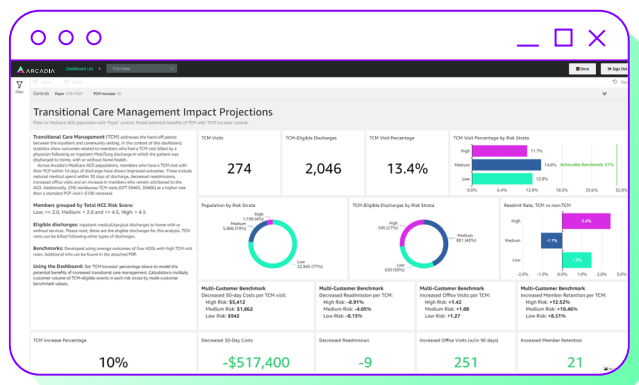

Empower data-driven decisions and innovations

Uncover deeper and actionable insights, faster

Optimize performance across the enterprise

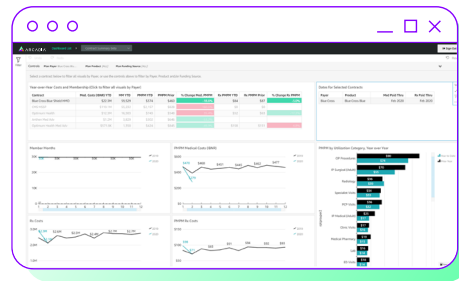

“We had selected Arcadia as a key healthcare technology partner because of Arcadia’s deep capabilities in building workflow tools which leverage huge volumes of data. Arcadia Vista is another example of how Arcadia is extending these capabilities by layering on complex data science models that allow Castell to get more value from our analytics platform and team.”

Andrew Sorenson,
Chief Analytics Officer, Castell

Arcadia Vista

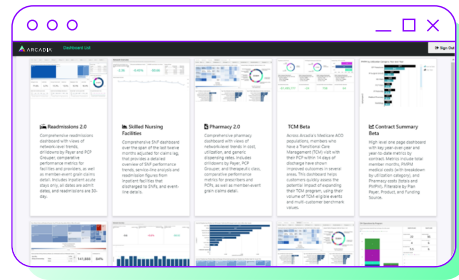

Your data has a story to tell

- Web-based, interactive visualizations
- In-memory calculation engine for blazing fast response times
- Empower users with data discovery

Growing library of analytic content

- Leverage best-practice dashboards from a community of value-based care leaders
- Analyses range from holistic contract management to detailed ROI projections for specific lines of business

Simplified and secure distribution of data insights

- Row-level security ensures data consumers see the appropriate data sets and populations
- Secure, in-app sharing of dashboards
- Built in collaboration with AWS on the QuickSight platform

Built on the
Amazon QuickSight Platform
powered by **aws**
