# Spare Parts Packages (SPP)

# Spare parts kits for current machines

**Spare Parts Packages allow you to stock critical parts for your system on-site, which means our service engineer can get your machine up and running as quickly as possible in the event of a machine hardware failure. This reduces waiting time, avoids productivity loss, and eliminates costly downtime.**

## Tailored to your needs

Spare Parts Packages are available for all current Kardex Remstar machines. There are three packages to choose from:

**Basic** allows you to keep several essential spare parts on-site.

**Extended** designed to support all the machine's functions and keep the most critical spare parts on-site.

**Individual / Customized** includes the extended package plus you can create a package tailored to your individual needs.

Minimal default time

Fast delivery

Highest guaranteed quality

Spare parts directly from the manufacturer

## Maximizing Uptime

If a machine hardware failure occurs, a service engineer will be able to quickly make repairs using parts stored on-site. Thereby minimizing the recovery time and maximizing the uptime of your equipment.

## Efficient and Stress-Free Operations

You'll feel confident knowing that it won't take a long time for repairs and no large spare part inventory is necessary. Your operations run efficiently and stress-free.

## Always Prepared

Prolonged downtime of machine hardware may ultimately jeopardize manufacturing and warehousing operations. Having spare parts available on-site allows for operations to resume quickly, usually within hours. This minimizes downtime and costs.

## Secure Set-Up

SPP includes only high quality and approved parts for Kardex Remstar devices to guarantee optimum machine efficiency after the repair. The service engineer will reorder parts used from your SPP to keep you up and running at all times.
