Kardex: Proudly American Made

Meet the US Factory

Kardex's newest production facility in Columbia, SC marks a significant leap forward in regional manufacturing capabilities, setting a new standard for American-made innovation and operational excellence. This state-of-the-art facility embodies our commitment to supporting the North American market, enhancing our service offerings, and reinforcing our position as a leader in the industry.

Kardex's US factory boasts an impressive 280,000 ft² and provides jobs to over 100 Americans. This plant not only exemplifies the cutting-edge manufacturing techniques we've refined in our German production facilities for decades, but also highlights Kardex's investment in creating jobs for the American economy.

The establishment of this facility markedly influences the North American markets by enhancing operational efficiencies and notably reducing lead times. Complying with the Buy American Act, Kardex positions itself as a prime candidate for government and military procurements of ASRS solutions. This alignment not only supports local economies and infrastructure but also ensures that sophisticated storage solutions are readily available across North America, bolstering Kardex's commitment to the region's market needs.

Buy American
Act
Compliant

Buy Kardex, Buy American

The Buy American Act strengthens the U.S. economy and job market by mandating the use of American-made materials in federally funded projects.

The Buy American Act, a cornerstone of American policy, fosters domestic manufacturing by ensuring that transportation infrastructure projects funded by federal dollars predominantly use U.S.-made materials. This legislation not only prioritizes American craftsmanship but also aims to bolster the national economy through sustained job creation and industrial growth.

Following the framework of the Buy American Act, we're thrilled to announce that the majority of our components are sourced and manufactured right here in the United States. Further, every step of production and assembly happens at our cutting-edge facility in South Carolina allowing us to proudly declare our products as 'American Made'.

This compliance facilitates a smoother procurement process for government and military contracts, offering our customers the assurance of high-quality, domestically produced storage solutions. Moreover, it underscores our commitment to supporting the American manufacturing sector, providing customers with not just products, but solutions that embody the spirit of innovation and resilience inherent to the American workforce.

We're here to help

Kardex's dedication to American manufacturing culminates in our state-of-the-art facility in South Carolina, embodying a commitment to quality, local employment, and compliance with the Buy American Act. This strategic move not only enhances operational efficiencies but also proudly aligns Kardex with American craftsmanship and innovation, offering clients high-quality, domestically produced ASRS solutions.
