

SUPERTITE

SUSPENDED DRAINAGE

Hang tough with **SUPERTITE** Suspended Drainage Systems

The **SUPERTITE** Suspended Drainage System brings smart design and fast installation together to give the ultimate above-ground stormwater solution.

SUPERTITE is constructed using **RCPA**'s unique high strength, light weight fibre-reinforced concrete composite which enables the product to be suspended.

SUPERTITE is the product of choice for contractors seeking a different approach to suspended drainage systems.

Fast. Smart. Proven. Strong.

SUPERTITE

Suspended Drainage

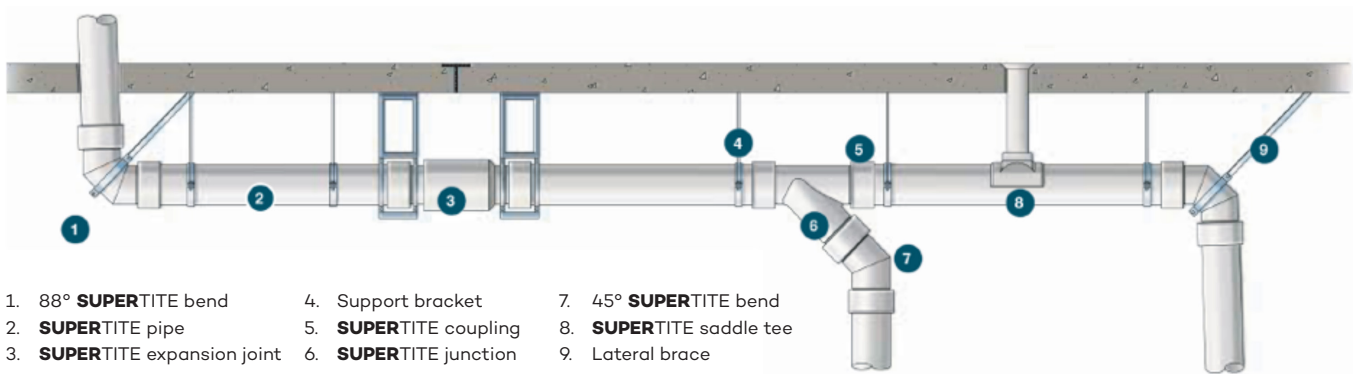

Suited to a range of projects, **SUPERTITE** is constructed using a high performance fibre-reinforced concrete pipe, with a unique joint design that provides a leak-resistant pipeline.

SUPERTITE is not only versatile, it is proven.

This innovative system comes with benefits including:

- Unique leak resistant joint system, with a chemical resistant nitrile 'dual V' rubber ring as standard for critical application;
- High performance design; and
- Extensive range of fittings providing true design and installation efficiency.

SUPERTITE Suspended Drainage System setup

1. 88° **SUPERTITE** bend
2. **SUPERTITE** pipe
3. **SUPERTITE** expansion joint
4. Support bracket
5. **SUPERTITE** coupling
6. **SUPERTITE** junction
7. 45° **SUPERTITE** bend
8. **SUPERTITE** saddle tee
9. Lateral brace

SUPERTITE Concrete Pipes (4m)
