

PANDA
WINDOWS & DOORS

Entry Doors

Quality

Engineering and Craftsmanship

We've been designing European-inspired windows and doors for over 30 years, catering to custom luxury residential and commercial projects.

Our dedicated team of engineers focuses on innovation and excellence, delivering industry-leading, premium-grade products.

Materials

Extrusions and Hardware

We source only the finest materials from the leading suppliers around the world. Products are made from abundantly available, highly recyclable, and sustainable materials.

Our hardware is designed in-house and features patented innovations, guaranteeing exceptional product fidelity and performance.

Custom

Bespoke and Innovative

Choose from over 80 state-of-the-art products, including sliding, folding, stacking, swinging, and pivoting options, all customizable to your exact specifications.

We offer select premium features such as automation, smart home integration, biometric smart locks, smart glass technology, and much more.

Service

Tailored and Reliable Support

An experienced team is just a call or a click away. So whether you need onsite support, a replacement part, or guidance over the phone, we're committed to resolving the issue quickly.

You can count on our exceptional customer support backed by a 10-year Warranty. Enjoy your windows, your doors, and your peace of mind.

Highlights

Panda's Entry Doors are custom-made and boast multi-point locks for unparalleled security and durability. Doors can reach 24' in height, are offered in single or double swing, pivot or hinged, and can be paired with any window style.

Maximum Security

Feature a concealed multi-point locking system with up to five locking points, providing exceptional security and peace of mind.

Effortless Operation

Swing open exceptionally large doors with just the push of a finger using Panda's proprietary designs, and enjoy the convenience of a self-closing door with a concealed closer.

Hardware

Drop Seal

A drop seal is a concealed, spring-loaded mechanism installed at the bottom of a door to create an airtight seal when the door is closed. Designed to improve energy efficiency, soundproofing, and weather resistance, it automatically lowers to block drafts, noise, smoke, and even light gaps. Ideal for both residential and commercial applications, drop seals enhance comfort and compliance with building standards without compromising the door's functionality or aesthetics.

Concealed Header Closer

Completely hidden within the door, this closer provides gentle, controlled closure, protecting your doors and providing peace of mind. Its durable aluminum construction and customizable settings ensure optimal performance in a variety of applications.

Pivot Closer

This advanced hardware ensures precise control and elegance for pivot doors. Adjustable soft-close, hydraulic backcheck, and self-closing with hold-open options enhance functionality.

An optional upgrade is available that offers enhanced control over door movement and is designed for larger, heavier doors.

Exclusive to Voyage Collection.

Multi-point Lock ± Roller Catch

With its robust steel construction and three-point locking system, this latch lock offers superior protection against intruders. The adjustable roller latch ensures a tight seal, while the Europrofile cylinder with unique key technology adds an extra layer of security. Designed for versatility, this lock is suitable for various door materials and thicknesses. Whether for residential or commercial use, this lock is the ultimate choice for peace of mind.

Up to two additional points can be optionally added for added security.

Three-Point Lock

Four-Point Extension

Test Results

Panda Windows and Doors prioritizes rigorous testing and certification, with nearly all products independently verified by the NFRC and AAMA, including six HVHZ-approved options. This commitment to quality ensures superior performance, energy efficiency, and security for homeowners and builders alike.

Tailored to You

At Panda Windows and Doors, we understand that every project is unique. Our commitment to customization extends beyond standard product offerings to encompass project-specific testing and engineering.

Whether you're facing the relentless winds of a coastal region or the extreme temperature fluctuations of a high-altitude environment, our team can design and test systems to meet your exact needs.

Engineered Solutions

By leveraging advanced engineering techniques and rigorous testing protocols, we ensure that our products deliver optimal performance in even the most demanding conditions.

UNIT #1
UNIT
TYPE

Materials

Unparalleled quality matched with incredible durability

All products are made with abundantly available, highly recyclable, and sustainable materials - Aluminum, Steel, Stainless Steel, Bronze, and Wood.

Aluminum

A highly versatile material capable of a wide range of shapes and finishes

- Affordable and low-maintenance
- Durable and highly customizable
- Thermally broken and energy efficient
- Superior thermal efficiency

Steel

Sleek and incredibly thin profiles that deliver unmatched durability and timeless elegance

- Exceptional strength and structural support
- Industrial and contemporary design aesthetic
- Forced entry and fire resistant
- Superior thermal efficiency

Stainless Steel

The luxurious and ultra-modern alternative to steel, providing unparalleled elegance and allure

- Exceptional strength and structural support
- Forced entry and fire resistant
- Outstanding rust and corrosion resistance
- Superior thermal efficiency

Architectural Bronze

A warm and inviting aesthetic with many of the same benefits of steel

- Exceptional strength and structural support
- Durable and low-maintenance
- Unparalleled rust and corrosion resistance
- Energy efficient and thermally broken

Wood

Naturally beautiful and full of character without compromising performance

- Durable and highly customizable
- Natural thermal and sound insulation
- Timeless and naturally inviting character
- Sustainable and highly recyclable

Finishes

Tailored finish options to perfectly suit your climate and vision

These high-quality finishes are designed to provide lasting beauty and robust protection that you can rely on.

Powder Coat

Color match or select from 25 Powder Coat colors available in AAMA 2604/2605, and Metallic/Bonded.

FEATURED

Anodized

For best-in-class corrosion resistance and durability, ideal for coastal applications.

FEATURED

Kynar Paint

Renowned for its exceptional color retention and sun-resistance, Kynar Paint stays vibrant even in the harshest climates.

FEATURED

Faux Wood

Enjoy the rich texture and natural look of real wood, with the strength and durability of aluminum.

FEATURED

Wood

Select from timeless classics like Pine or Poplar, or exotic species like Cherry, Mahogany, Maple, and more.
