"Expanded Seal Flexibility with U-Plus™ Bracket"

"All You Need to Know About ProPort™ Casings"

*I am Viking Pump's **NEXT** generation of innovative positive displacement pumps. I have flexible porting options, various seal solutions, and flow rates up to 320 GPM for Stainless Steel and 500 GPM for Steel.*

*My **NEW** pump design offers **significantly more options** to fit your current setup **without compromising** on Viking Pump's **reliable pumping principles** that we have held since our founding in 1911.*

*And while you may be familiar with past products, this **NEXT** generation of pumps takes all of the good parts and makes them **even better**.*

*I look forward to working for **YOU**.*

WORK EXPERIENCE

1904 - Present

120 years of pumping experience.
The internal gear pump was patented by Viking Pump's founder, Jens Nielsen, in 1904. This creates the strong foundation that our modern solutions are based on.

Various roles held in numerous applications like chemicals, fuels, molasses, chocolate, just to name a few.

Experience working on all 7 continents.

SKILLS

- **Flexible.** Can fit existing setup without having to modify your piping.
- **Can hit the ground running.** Drop in replacement.
- **Seal interchangeability.** Due to the U-Plus Bracket, you can utilize the seal of your choice.
- **Adaptable.** Easily adapt to new conditions.
- **Works well under pressure.** Up to 150 PSI, in fact.
- **Commitment Oriented.** Will stay loyal to your business through thick & thin (up to 2,000,000 SSU)
- **Willing to put in overtime.**
- **Problem solver, solution provider.**
- **Reliable.**

NOTABLE ACCOMPLISHMENTS

- Strong track record of **reduced downtime**
- **Patents** (Both approved & pending)
- U-Plus™ Bracket
- ProPort™ Casing
