

OpenText Secure Cloud

One platform. Smarter cybersecurity, simplified.

This decade is on track to be known as the decade of cybercrime, and attacks are costing organizations dearly. Ransomware, malware, and phishing have all become ubiquitous, which collectively continue to innovate and lead to successful monetary gains for bad actors. The complexity of managing tool sprawl to combat this is stretching already stressed IT and security professionals thin.

These dynamics have given rise to the need for a unified, holistic security approach that can:

- Quickly and effectively deploy cybersecurity and data protection solutions
- Reduce the overhead that comes from managing disparate solutions
- Avoid the runaround that comes from multiple vendor support teams

OpenText Cybersecurity Secure Cloud is trusted by tens of thousands of customers, helping them spend less time managing security and more time focusing on their businesses.

Benefits

- Protect, manage, and govern data across endpoints, systems and applications
- Simplify vendor management, billing, and support
- Enhance security efficacy with real-time, cloud-based machine-learning insights
- Have 24/7 access to our in-house team of seasoned security experts
- Meet common cyber insurance requirements
- Simplify workflows for a frictionless experience, minimizing administrative complexity

Digital Boardwalk

“In this world where having dozens of solution partners is the norm, our partnership with OpenText is a clear standout. Their Secure Cloud platform brings together a multitude of vital solutions into a single, easy to use portal that makes managing our clients a breeze.”

- **Brian Wilkey**
Executive Vice President
of Digital Boardwalk

Discover the Secure Cloud platform and solutions

Secure Cloud offers a modern approach to cybersecurity, leveraging a cloud-based architecture that empowers you to secure your company’s data and protect your extended environment quickly and at scale.

Our solution suite is powered by real-time, contextual threat intelligence that provides your IT and security teams with insights aggregated from 100 million global threat signals. Secure Cloud’s high-efficacy product portfolio for small to mid-sized businesses enables you to implement a holistic security program that you can manage from a central console, reducing your administrative and management complexity while providing an easy and compliant experience.

OpenText Secure Cloud

Recovery and Compliance

Cloud to Cloud Backup

Provide comprehensive, automatic backup and recovery for popular SaaS applications such as Microsoft 365, Google and Salesforce.

Email Continuity Services

Provides failsafe protection for your email and ensures email access, even when your email infrastructure is down.

Information Archive

Empower your organization to meet changing regulatory and corporate governance requirements.

Threat Protection and Email Security

Email Encryption

Removes the hassle of encrypting email and makes it easy to meet compliance requirements.

Email Threat Protection

Provide multi-layered filtering for both inbound and outbound emails protecting against phishing, ransomware, BEC, impersonation, and more.

Security Awareness Training

Educate your employees to identify and report scams to strengthen your organization's security posture.

Endpoint Protection

Comprehensively tackle the most advanced endpoint attacks, whether from internal or external threats.

DNS Protection

Keep web-based threats, malware-downloads, and online content from wreaking havoc on your users.

Modern Work and CSP Solutions

Microsoft 365

Optimize licensing and management to empower your organization to better guard against business email compromise (BEC) and other email threats with a free Microsoft Security Audit

Dynamics 365

Delivers superior operational efficiency and breakthrough customer experiences that enable businesses to become more agile with a portfolio of intelligent business applications.

Microsoft Azure

Available for MSPs, accelerate migration and modernization with industry-leading information management from OpenText's applications deployed on the highly secure Microsoft Azure public cloud

One platform to streamline Cybersecurity

From prevention and protection to recovery and compliance, you can find all your needs under the same roof. You'll spend less time managing your security and more time focusing on your business. Empower your organization to achieve its security goals and fortify its future with OpenText's consolidated web-based platform that provides layered security strategy. Simplify your cybersecurity with turnkey solutions for your organization's unique needs.
