

A modern archiving solution – built with businesses in mind

Archive communications and make eDiscovery easier for your team

Archiving means creating a repository of immutable data that needs to be stored over time. Over the past few years, it has become a necessity in order for organizations to:

Prove compliance

Defend themselves in legal matters

Provide corporate oversight and business controls

Maintaining compliance is challenging and expensive:

71%

of countries have laws in place to protect consumers' personal information¹

\$4M

is lost, on average, due to a single non-compliance event²

Other archiving solutions don't meet the needs of businesses today:

-  Sharing data securely with outside parties
-  Archiving multiple sources of data (i.e., more than just email)
-  A solution that's cost-effective and easy to use requirements

Luckily, not all archiving solutions are built the same!

With Carbonite Information Archiving you can:

-  **Quickly and securely** share eDiscovery findings with outside parties during litigations – without SFTP sites or external hard drives
-  **Intuitively search** data across email, social media and collaboration tools
-  **Save time and money** by using a solution that consolidates 50+ sources of communication data into one search
-  **Investigate complaints and violations faster** by examining all communications in one place
-  **Increase security** with delegated access control

How it works

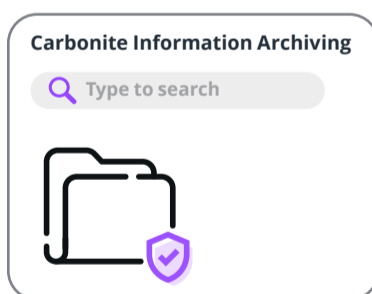

Reduces IT, HR and legal costs

Compelling event →

Run a quick search →

Expedite a resolution

M&A
Litigation
HR compliant
Audit

- Surface incriminating conversations
- Suit has no merit - one email and it's dismissed
- Concern validated
- Demonstrate compliance, safely share select information

Carbonite Information Archiving helps you:

- Maintain compliance and meet evolving regulations
- Proactively protect the business from unplanned litigations
- Save time, money and resources with an easy-to-search archiving solution

Protect your organization against compliance violations and unplanned litigations. Learn more about how Carbonite can help you today.
