

## Product Update Bulletin

# Carbonite Safe® Server Backup – v6.8

New Carbonite Safe® server backup enhancements to save you time and storage space for your incremental backups. We are excited to introduce our latest update with enhanced Forever Incremental backup.

### New features in this release

#### Enhanced Forever Incremental Backup Type

To help your business be even more resilient to data loss, this new addition enables users to incrementally forever back up their data without impacting performance, it means you can run more frequent incremental backups and enjoy improved recoverability while saving on the storage space.

#### Improved performance

In addition, we optimized backup times, and your incremental backups will now run 2X faster than previous versions

#### Support and product information resources
