Otis® GU shear up adaptor

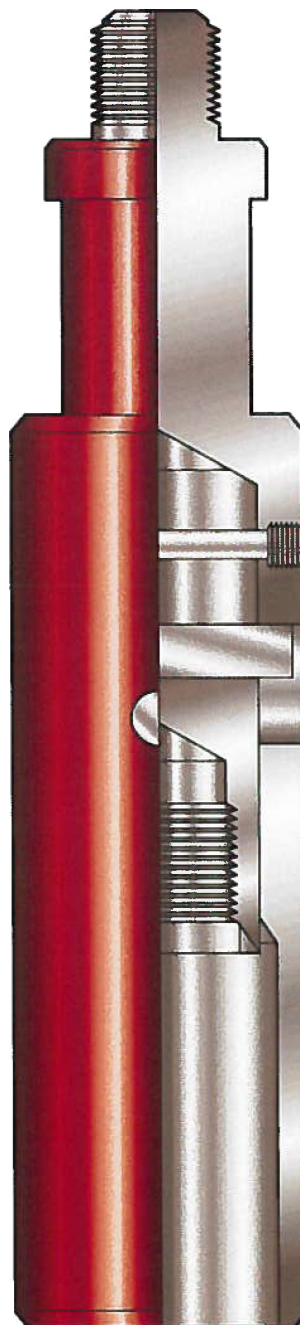

The Halliburton Otis® GU Shear Up Adaptor is designed to convert a standard GS, jar down to shear tool, into a GR, jar up to shear tool.

The adaptor is installed onto the Halliburton Otis® GS Pulling Tool. Next, the shear pin is removed from the Halliburton Otis® GS Pulling Tool. This enables the shear pin in the Halliburton Otis® GU Shear Up Adaptor to become active. The combined tool is now categorized as a Halliburton GR Pulling Tool.

The Halliburton Otis® GR Pulling Tool is recommended where downward jarring on the subsurface device is required prior to pulling.

The adaptors are available to suit all sizes of the Halliburton Otis® GS Pulling Tools.

The adaptors are supplied with industry-standard pin connections with fishing necks.

Halliburton Otis® J running tool
