

COMPLETION SOLUTIONS | INTERVENTION SOLUTIONS

Halliburton Integrated One-Trip Junk Basket and EV0-Trieve™ retrievable bridge plug

Reduce rig time and risk during intervention (V0) barrier operations

FEATURES

- Operated on e-line and wireline with standard wireline running and pulling tools
- Simple, user-friendly design

BENEFITS

- Help reduce rig time and risk during intervention operations

APPLICATIONS

- Integrated One-Trip Junk Basket is run in hole with the industry-recognized EV0-Trieve™ bridge plug, sets the plug, and protects it from debris

Overview

The Halliburton Integrated One-Trip Junk Basket is based on the field-proven P330JB0 Standard Junk Basket product line used with the EV0-Trieve™ bridge plug.

This integrated junk basket acts as part of the setting string and running tool for the EV0-Trieve bridge plug when first run but remains in the hole with the EV0-Trieve bridge plug to help protect it from settling debris while temporary operations are performed.

The P330JE0 Integrated One-Trip Junk Basket is a device used to help prevent discarded items from being dropped into areas of the wellbore that must remain uncontaminated.

The junk basket provides both capture and retrieval of contaminants using simple wireline techniques.

Halliburton Integrated One-Trip Junk Basket specifications

SIZE (IN.)	OD (IN.)	LENGTH (IN.)
3 1/2	2.685	93.80
