

# EvoEndo Chargemaster Checklist

The codes and charges assigned in the hospital charge master serves as an internal support reference for billing and contracting with payers.

Ensure EvoEndo's product number and item list below is recorded in the chargemaster

Confirm assignment of items and codes to one or more revenue centers or departments including charges based on the facility standard practices

Assure all charges are updated and consistent based on current manufacturer and payer contracts

Assure the electronic medical record system includes all procedures and products, even those that may not be separately paid

## EvoEndo Product Numbers

EvoEndo Product Number	Item	Device Type
1001	EvoEndo® Model LE Gastroscope – Single 110 cm	Sterile, single patient use
1005	EvoEndo® Model LE Gastroscope – 5-pack 110 cm	Sterile, single patient use
1021	EvoEndo® Model LE Gastroscope – Single 85 cm	Sterile, single patient use
1025	EvoEndo® Model LE Gastroscope – 5-pack 85 cm	Sterile, single patient use
1002	EvoEndo® Controller	Capital, reusable
1006	EvoEndo® Patient Experience Kit (5-pack)	Non-sterile supply

## Select Revenue Codes

The EvoEndo Gastroscope is a sterile single patient use device. For billing, assign and report use of the Gastroscope with one or more revenue code(s) on insurance claims with facility charges.

Possible revenue code categories for EvoEndo Gastrosopes. Others may apply.

027X	Medical/Surgical Supplies and Devices (Also see 062X, an extension of 027X) 0270 – General 0271 – Nonsterile 0272 – Sterile 0279 – Other supplies/devices
062X	Medical/Surgical Supplies - Extension of 027X 0621 – Incident to Radiology 0622 – Incident to Other Diagnostic services
075X	0750 – Gastrointestinal Services, General

# EvoEndo® LE Single-Use Endoscopy System CPT Coding

## Esophagoscopy

*Endoscopy/Esophagoscopy guidelines describe esophagoscopy as examination from the cricopharyngeus muscle (upper esophageal sphincter) to and including the gastroesophageal junction. It may also include examination of the proximal region of the stomach via retroflexion when performed.*

*The distinction between the codes for rigid and flexible esophagoscopy is necessary because different devices, means of sedation, and/or anesthesia are used, and physician work (including risk) is different. Transoral rigid esophagoscopy is typically performed under general anesthesia; transoral flexible esophagoscopy is typically performed under moderate sedation; and transnasal flexible esophagoscopy is typically performed using topical anesthesia.<sup>1</sup>*

CPT Code*	Short Description
43197	Esophagoscopy flex dx brush
43198	Esophagosc flex trnsn biopsy
43202	Esophagoscopy flex biopsy
43220	Esophagoscopy balloon <30mm
43226	Esoph endoscopy dilation

## Esophagogastroduodenoscopy

*Once an endoscope traverses the pyloric channel and enters the small intestine, the procedure is then described as esophagogastroduodenoscopy, or EGD. A complete esophagogastroduodenoscopy includes examination of the duodenum and/or jejunum.<sup>2</sup>*

CPT Code*	Short Description
0652T	Egd flx transnasal dx br/wa
0653T	Egd flx transnasal bx 1/mlt
0654T	Egd flx transnasal tube/cath
43235	Egd diagnostic brush wash
43236	Uppr gi scope w/submuc inj
43239	Egd biopsy single/multiple
43241	Egd tube/cath insertion
43243	Egd injection varices
43245	Egd dilate stricture
43247	Egd remove foreign body
43248	Egd guide wire insertion
43249	Esoph egd dilation <30 mm
