

HIGH-EFFICIENCY COMMERCIAL GAS WATER HEATER

# CYCLONE™

## Flexible installation. Smart combustion.

Designed for high-demand commercial hot water applications, the Cyclone™ FLEX™ delivers premium efficiency, advanced control technology, and ease of installation.

Featuring advanced controls, simplified installation, and input capacities from 100,000 to 500,000 BTU/h to fit a wide range of commercial applications.

### What's new:

AiQ™ Adaptive Gas Valve Technology

New Building Management System (BMS) Module

Extended Venting Capabilities - Up to 200 ft.

Expanded Inputs and Tank Options

Non-Sacrificial Powered Anodes

7" Color Touchscreen

Factory-Supplied Leak Detection

# AiQ™ Adaptive Gas Valve Technology

A New Standard in **Smart Combustion Control**

- **Self-Adjusting for Fuel Quality**  
Automatically adapts to varying gas qualities, ensuring consistent performance without manual tuning.
- **Precision Combustion**  
Integrated servo motor and electronic controller optimize the air-fuel mix for cleaner and more efficient burns.
- **Faster, More Reliable Start-Up**  
Improves ignition and light-off performance, reducing nuisance lockouts and service calls.

## Match-Your-Application **Performance Options**

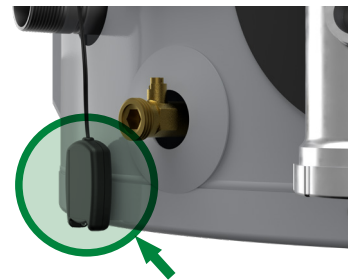

The Cyclone™ FLEX™ line delivers unmatched hot water performance to fit a **broader range** of commercial applications.

60 USG		100 USG		119 USG	
BTH-100	100,000 BTU	BTH-150	150,000 BTU	BTH-251	251,000 BTU
BTH-120	120,000 BTU	BTH-199	199,900 BTU	BTH-300	300,000 BTU
BTH-145	145,000 BTU	BTH-250	250,000 BTU	BTH-400	399,900 BTU
				BTH-500	499,900 BTU

## **Factory-Supplied** Leak Detection

An alarm is triggered and sends remote alerts via iCOMM™ app. This feature helps prevent water damage by providing early warnings.

## **NEW** Optional BMS Gateway Module

Makes connecting to building management systems easier than ever.

Specify the Cyclone™ FLEX™ for your next commercial project.
