

## LEAK SHIELD™ AUTOMATIC COLD WATER SHUT-OFF VALVE KIT

The A. O. Smith Leak Shield™ Automatic Cold Water Shut-Off Valve Kit provides proactive protection against water damage by automatically stopping the incoming cold-water supply when a leak is detected. Designed for seamless integration with A. O. Smith water heaters equipped with iCOMM™ smart technology, this valve kit enhances system safety and reliability. Ideal for residential and light commercial applications, Leak Shield™ offers dependable automatic protection with the added convenience of a manual override and clear visual position indication.

### FEATURES

- Automatically shuts off cold water supply upon leak detection
- Manual open/close override with visual position indicator
- Designed for installation on or near the cold-water inlet
- Compatible with A. O. Smith water heaters that are equipped with iCOMM™ smart technology

### OPERATION

- When water is detected by the leak detection system, the valve closes the incoming cold-water line
- Manual operation is available directly at the valve if required.

### INSTALLATION REQUIREMENTS

- Install on incoming cold-water line near water heater
- Follow included valve kit installation instructions
- Intended for use with compatible A. O. Smith leak detection systems

### APPLICATIONS

- Residential water heater installations
- Light commercial water heater installations
- Locations requiring automatic water shut-off protection

### WARRANTY

Limited manufacturer warranty. Refer to kit documentation for terms
