

ECOPEAK® Standard Models - Expert Plus

Unlike traditional two-element water heaters, whose power demand is concentrated during peak periods, three-element heaters draw less power and spread energy consumption throughout the day.

Standards

- Meet CSA 22.2 construction standards
- Meet or exceed NRCan energy efficiency standards

Benefits

- A sustainable choice that lowers the collective electricity demand during peak periods.
- Less stress on electrical components, extends service life and increases reliability.
- Oversized high-quality magnesium anode
- Equipped with medium density CSA approved screw-in type immersion elements made by Giant
- Coating of blue cobalt glass to protect the inner tank against corrosion and perforation.
- Secure brass drain valve for easy drainage
- Factory-installed 3/4" NPT dielectric connections
- Factory-installed heat traps help reduce hot water migration, thus limiting heat loss

- Safety valve protects the tank against the damaging effects of excess temperature and pressure
- Automatic temperature control with adjustable thermostats
- Uniform thickness of insulating foam keeps water warmer for longer periods

Warranty

- 6-year warranty against inner tank leakage
- 6-year warranty on parts

Illustrated model: 172STPS-3S8M-E6
