

# Private Equity Pharmacy Benefit Solutions

## Improve Your Portfolio Company Pharmacy Expense with Guaranteed Savings, Lower Risk, and Transparent Results

Healthcare spend is the #2 line item on a P&L – pharmacy is the #1 driver of that cost

- Pharmacy is the fastest rising component of healthcare spend, with an **8.4% increase in 2022**, and represents the largest opportunity for savings
- Specialty medication spend is growing at a double-digit rate
- 90% of a company's overall pharmacy spend is on high-cost branded and specialty medications

**Pharmacy is the #1 health benefit  
used by portfolio company employees**

**2% of employees drive 50%  
of portfolio company pharmacy spend**

Since 1995, RxBenefits has addressed the high pharmacy cost challenges of many self-funded employers by generating unprecedented savings and risk mitigation. Today, we manage over 3M members and \$3B in annual pharmacy spend, including partnering with over 350 private equity sponsored companies representing 100+ private equity firms in the US.

## What you can expect:

- Portfolio company EBITDA improvements due to superior first-year contract pricing and annual pricing enhancements
- Independent PharmD-led utilization management, with advanced oversight on expensive specialty medications, to further increase EBITDA with savings and quantified risk stratification
- Supplemental stop-loss solution to mitigate current and future risk of catastrophic, and often recurring, specialty claims
- Award-winning service that delivers high client and member satisfaction with limited disruption
- Private equity analytics platform providing individual company and aggregate reporting with near real-time spend analysis and predictive modeling

**Manage 3M members and \$3B in annual pharmacy spend**

**Partner with 350 private equity sponsored companies representing 100+ private equity firms in the US**
