

Better member benefits start with a focus on their needs – today and tomorrow.

You and your members face unprecedented challenges fueled by breakthrough specialty medications, high-cost brand name drugs, and the onslaught of off-label GLP-1 prescribing, as well as expanding indications. Better rates and rebates alone won't address these issues and ensure member satisfaction. Navigating complex pharmacy benefits options is a lot to take on. Identifying the best cost containment strategies and ensuring your member needs are met can be time-consuming and can feel overwhelming.

Providing excellent member service for

3M

Your members' needs are unique. So is our model.

As the nation's first and leading pharmacy benefits optimizer (PBO), we're experts at helping funds and benefits advisors make prescription medications more affordable while taking better care of valued members.

RxBenefits operates completely **free from financial conflicts**. We do not benefit from formulary incentives, spread pricing, or retained rebates that drive up plan costs. Our clients pay directly for our award-winning services through fixed fees, **backed by an ROI savings guarantee** for our clinical programs.

What sets us apart.

Caring for your members and your fund with tailored pharmacy benefits through strategic savings and sustainable success.

Curated Solutions Marketplace

Because no two plans are the same, RxBenefits maintains a curated marketplace where traditional and transparent pharmacy benefits managers (PBMs) compete side-by-side for business. We evaluate plan data to deliver tailored recommendations aligned with each client's savings and member satisfaction goals.

Our specialty cost containment strategies help achieve savings through manufacturer copay and patient assistance programs, as well as expanded access to lower-cost medications, approved by the U.S. Food and Drug Administration, sourced internationally.

Our detailed financial and clinical analyses, coupled with expert recommendations, enables funds to compare multiple offers, weigh pros and cons, and make confident, cost-effective decisions all while ensuring members are the focus.

Unbiased Clinical Management

When PBMs fail to control wasteful spending on inappropriate, high-cost prescriptions, plan costs skyrocket.

For the **2%-3% of members using specialty drugs – which drive more than 50% of plan costs** – RxBenefits steps in.

Independent pharmacists lead a targeted clinical management process and act with objectivity to replace costly medications with clinically equivalent, lower-cost alternatives, lowering fund costs and protecting member health.

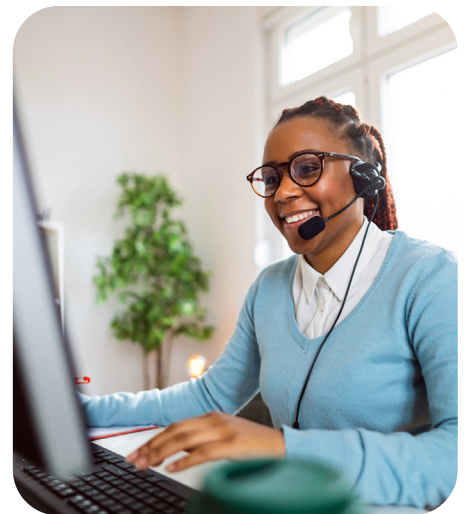

Convenient tools like real-time texts with prior authorization status and an easy-to-use member portal further enhance the member experience.

7:1 ROI on clinical programs

Award-Winning Service

Our exceptional business development, account management, and clinical teams will partner with you every step of the way in designing, building, and managing a member first pharmacy benefits solution. Our award-winning, U.S.-based client and member service teams anticipate needs and act swiftly to troubleshoot when challenges arise, operating with empathy and a bias towards prompt resolution.

48 Our Net Promoter Score in an industry with an average score of <10.

Strategic Savings. Sustainable Success.

At RxBenefits, success is not measured by one balance sheet or at a single point in time. It's an ongoing commitment to meeting today's challenges and predicting tomorrow's trends for sustainable, future-proof, and dependable cost savings that Taft-Hartley funds can reinvest in their people, projects, and processes.
