

Lookout Security Platform

Enabling the U.S. government to achieve Zero Trust

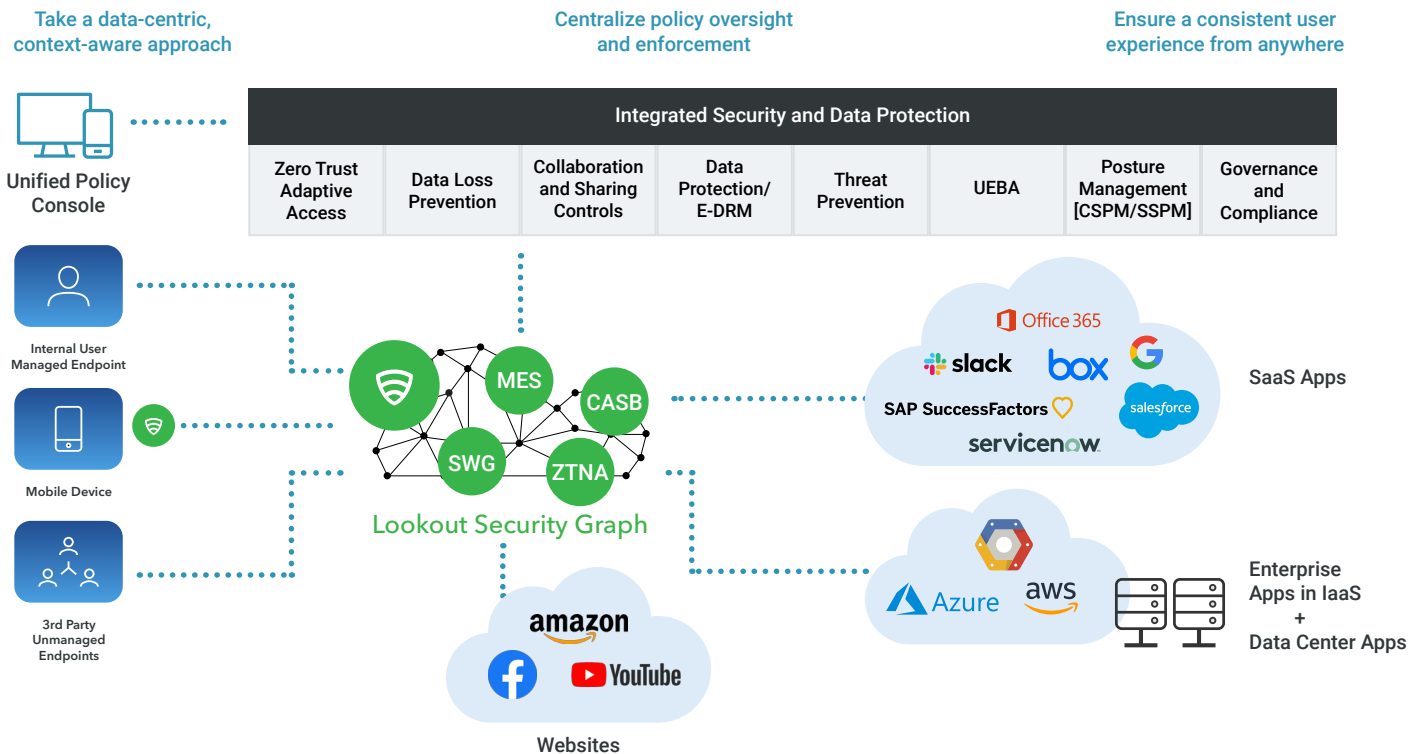

Executive Order 140285 mandates federal agencies to adopt Zero Trust architecture

In today's environment, security teams cannot trust users that attempt to connect to their network, applications and data, even after they have authenticated. Instead, they must constantly verify the risk level to ensure that users can be trusted. This conceptual framework is now a requirement.

Lookout delivers a unified SASE platform for Zero Trust

The [Lookout Security Platform](#) enables you to consolidate your SASE strategy into a unified security platform that reduces cost and complexity while simplifying security and access management access across all your endpoints, clouds and on-premises infrastructure.

Lookout Cloud Security: Endpoint-to-Cloud

By integrating our industry-leading mobile endpoint security and Secure Access Service Edge (SASE) solutions, we enable organizations to deploy intelligent Zero Trust security that safeguards sensitive data without hindering productivity.

Cloud Access Security Broker (CASB)

Gain centralized visibility into and control over managed or unmanaged SaaS, IaaS and private apps and data. Achieve integrated Zero Trust access control, data protection, threat prevention and policy compliance across leading SaaS apps.

Zero Trust Network Access (ZTNA)

Enable users with secure remote access to apps in private clouds and inside data centers.

Mobile Endpoint Security

Secure against phishing, app, device and network threats across personal, managed, and unmanaged mobile devices.

Secure DNS

By continuously monitoring the web for malicious sites, Lookout delivers comprehensive protection against phishing attacks in real-time.

Secure Web Gateway (SWG)

We detect malicious websites in real-time, and when needed, block access to your employees, business and data.

Mobile Endpoint Detection and Response (EDR)

Query our app and device telemetry and search continuously updated results of our analysis of malicious and phishing websites.

About Lookout

Lookout is an integrated endpoint-to-cloud security company. Our mission is to secure and empower our digital future in a privacy-focused world where mobility and cloud are essential to all we do for work and play. We enable consumers and employees to protect their data, and to securely stay connected without violating their privacy and trust. Lookout is trusted by millions of consumers, the largest enterprises and government agencies, and partners such as AT&T, Verizon, Vodafone, Microsoft, Google, and Apple. Headquartered in San Francisco, Lookout has offices in Amsterdam, Boston, London, Sydney, Tokyo, Toronto and Washington, D.C.
