Ingredients and %w/w composition are listed in the appendix (subject to valid request).

The formulation of the above named product was screened to determine if the declared ingredients are listed on the California Proposition 65 list of chemicals known to the state to cause cancer or reproductive toxicity. The following conditions apply to this assessment:

- The California Proposition 65 screen is based solely on the formulation provided to Intertek by Tremco.
- It was assumed that the formulation given is accurate, all ingredients are disclosed, as listed in the appendix table, subject to valid request.
- Intertek did not perform analytical testing to confirm the accuracy of the formulations provided or test for heavy metals, lead, impurities, etc.
- This product was not assessed for compliance with regulations.

Conclusion: Following a review of the declared product formulation, the ingredients marked with an (*) in the appendix, which are present in the product in minor amounts, are listed on the California Proposition 65 list of chemicals known to the state to cause cancer and/or reproductive toxicity dated November 23, 2018.

This evaluation applies only to the formulation that has been provided in the corresponding confidential appendix to this report and the conditions described herein. Any substitution of ingredients will necessitate a new evaluation. This appendix is held on file at the Mississauga Intertek Office.
