

Next Generation Sealant DuctSeal LT

AeroSeal is introducing our next generation sealant to our domestic and international Commercial channel partners. Duct Seal LT is a better-performing, low-tack formula that seals without the stubborn stickiness of the original sealant. With DuctSeal LT, you'll get tighter results with far less cleanup.

Changing your sealant to DuctSeal LT is simple – use it in exactly the same way as the original DuctSeal.

LAST CALL TO ORDER ORIGINAL DUCT SEAL

The original Duct Seal is available while supplies last. Email orders@aeroseal.com or visit the online store at <https://store.aeroseal.com>.

DuctSeal LT (FS00168)

Better performing formula for easier application, improved sealing, and less cleanup

Exceeds DuctSeal UL certified durability tests under high temperature and pressure; LT is certified under UL 1381

Aligns with updated codes, safety certifications, and customer demands worldwide

Proven successful in the U.S. market with 2 years of strong adoption and consistently high performance.

With same physical profile, order sizes and cost as original DuctSeal

CERTIFICATES

DUCTSEAL LT

Safety Data Sheets

UL 1381 Fire, Smoke, Mold Durability Standards

UL Fire and Smoke Damper Study

COMPARISON

	DuctSeal LT	Original DuctSeal
Erosion Test	6000FPM	2000FPM
Burst Pressure	Both hold pressures up to 20 in. wc	
Durability	Both UL Certified	
Seal Speed	Provide identical seal performance and strength.	
Tackiness	● ○ ○	● ● ●

DuctSeal LT Customer Testimonial

"I get zero clogging and I find myself being about to seal longer (tighter) with no issues. Also, clean up is much easier! If something is spilled, it's much easier to clean up!"

David Wingate, Metro Test and Balance, MD

SEALANT ORDERING & CUSTOMER SUPPORT

To order original Duct Seal and the new Duct Seal LT:

- Email orders@aeroseal.com
- Go to our website at <https://store.aeroseal.com>
- Contact us directly. U.S. dealers can reach out directly to Justin Moss at justin.moss@aeroseal.com. International dealers can contact Jake Smith at jake.smith@aeroseal.com.

DuctSeal LT Customer Testimonial

"Although I do miss the "Elmers Glue" scent a bit, it is certainly a relief to not have a strong-smelling fog emanating from the sealing areas during overspray events."

Andrew Farr, Action Duct Cleaning, CA

Contact billing@aeroseal.com for invoicing questions.

Any other requests, or general support needs, can be directed to customersupport@aeroseal.com.

CERTIFICATIONS

Dealers can access a comprehensive library of certificates and other documents at [Aeroseal Support](#).

- UL 555 Damper Test, NGBS Green Certification, NSF Certificate
- UL 1381 Fire, Smoke, Mold Resistance, and Durability
- Fire Damper Tests, Disinfection Agents, and Chemical Resistant Tests

ABOUT DUCTSEAL LT

DuctSeal LT is a stable, non-toxic, non-flammable emulsion of water-based acrylic polymer that is aerosolized into 4-10 micron-sized particles and distributed under pressure throughout the inside of the duct system. The particles deposit only at the leak sites and build to form a tenacious and tight air seal, remaining firmly in place for years while staying completely pliable and flexible. Seal remains effective over a wide range of operating pressures, temperatures and humidity levels found in residential, commercial, and industrial air duct systems.
