

CUSTOMER STORY

Streamlining Jetfly Group's consolidation for maximum efficiency

Key results snapshot

- ✓ Intuitive, flexible platform to handle large volumes of data.
- ✓ Enhanced traceability and a simplified audit process.
- ✓ Reduced risk of errors due to manual input.

Business challenges

Jetfly experienced significant growth in its operations, and until recently, was doing consolidations in spreadsheets. This meant a lack of traceability, limited flexibility (with a lot of manual input), and large files due to the number of formulas within each workbook—leading to errors.

Why Prophix

Jetfly's Office of Finance was on the lookout for a more robust consolidation solution for several entities, mainly in Europe. Balancing a substantial volume of data, while also being reliable and offering full traceability, Prophix was the right solution to replace their legacy spreadsheets in Excel.

Key results

With financial consolidation in place, Jetfly quickly saw a streamlined process and increased quality of financial information.

With Prophix, Jetfly was able to:

- ✓ Implement an intuitive, flexible solution capable of handling large volumes of data to streamline consolidations.
- ✓ Reduce the risk of errors with a centralized, automated process.
- ✓ Improve traceability and simplify the audit process through historical data.
- ✓ Faster communication with auditors due to standardized audit reports.

Who is Jetfly?

Headquartered in Luxembourg, Jetfly Group is a conglomerate of three prominent private airlines offering unique flight solutions, including shared ownership, aircraft management, and full ownership solutions.

Applications deployed

Financial
Consolidation

“[Prophix] is the answer to all our requirements regarding consolidation. The tool is intuitive, and has a modern, pleasant interface. The application is very performant and our data is now more reliable.”
