

Prophix Financial Intelligence

For Trimble Construction One & Spectrum

Financial Reporting & Analytics: A Blueprint for Success With Prophix

In recent years, the construction industry has begun to prioritize financial automation. Companies realized that complex spreadsheets and data silos hindered their ability to grow, making them less confident in their business decisions. Take control of your data - join hundreds of contractors who have eliminated their Excel pain and modernized their Finance operations with Prophix!

Prophix & Trimble: Two Best-in-Class Platforms

Prophix is a mid-market leader in cloud Corporate Performance Management (CPM) software. Since 2018, Prophix has been Trimble's (formerly Viewpoint) partner of choice for financial planning & analysis for the construction industry. We're also experts on Viewpoint's data infrastructure – so you never need to worry about integration again. Prophix has a certified data integration with Viewpoint Spectrum, Viewpoint Vista, and Trimble Construction One.

Prophix Financial Intelligence for Trimble Construction One & Spectrum

We designed Prophix Financial Intelligence with Viewpoint customers in mind. There's no longer a need to report in one system and plan in another. Prophix's all-in-one solution gives you real-time access to your most crucial data points through seamless integration with Viewpoint and Trimble. Stop compromising your data security with spreadsheets – Prophix gives you a 360° view of your KPIs within our secure cloud platform.

What You Get with Prophix Financial Intelligence:

- Your business-critical financial reports (P&L, balance sheet, cash flow) are readily available on any device.
- Self-service, click & drag reporting means no more waiting for a new report to be created and no formulas or coding.
- View out-of-the-box industry KPIs in informative Dashboards, including days sales outstanding (DSO), days of cash, and margin fade and gain.
- Automated report distribution and the ability to drill down to transaction level.

What Our Customers Say

Hundreds of contractors have already switched from spreadsheets to Prophix.

“Automating their financial processes has also allowed Alterman to reduce their budgeting time from about three days to eight hours to create a complete budget.”

“By tracking the necessary variables at the appropriate level of detail, Encore Electric improved their Days Sales Outstanding (DSO) by 40 days.”

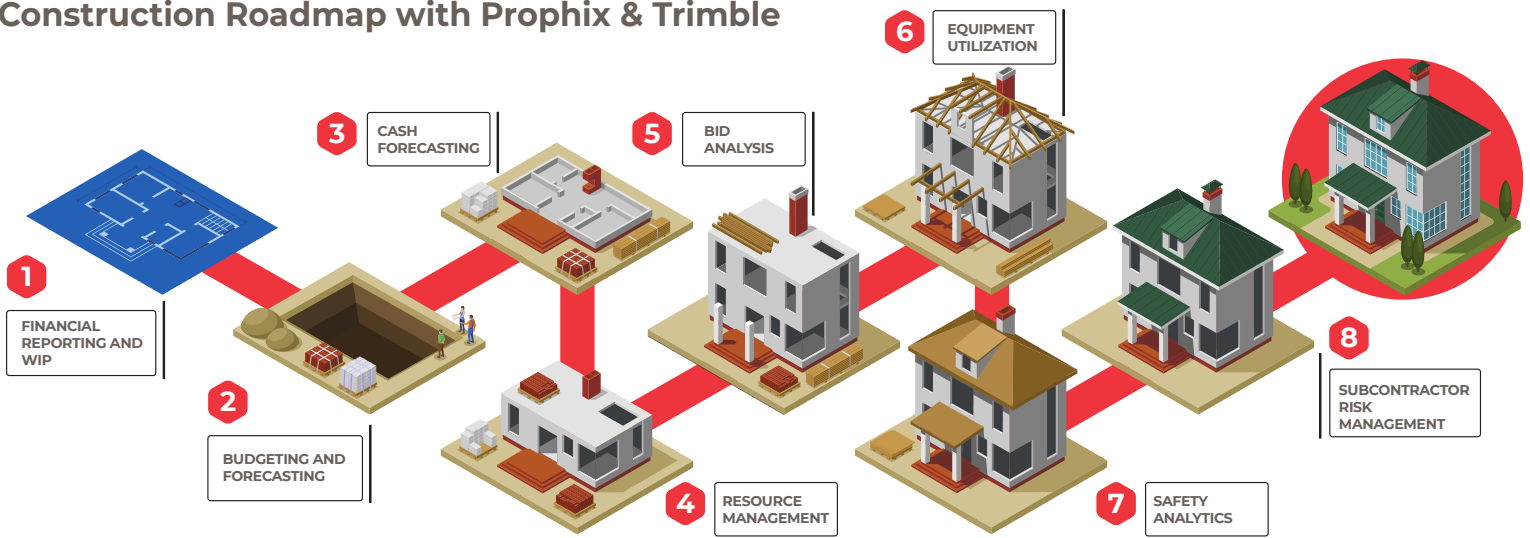

“So, if I had to put a return on investment, I would say we’re probably at 130% to 140% in year one... and I just see it getting better. It’s not going to be static, we’re going to be a better company because of it.”

Prophix Scales Along With Your Business

Prophix Financial Intelligence enables you to drive a greater return on your investment by scaling your finance processes, including reporting, forecasting, budgeting, personnel planning, cash flow and scenario planning, and financial consolidations. Partner with Prophix and Trimble to transform your finance function.
