

Not all AI is created equal

Finance leaders spend up to 65% of their time on data collection, reconciliation, and manual reporting, leaving less time for work that drives performance.

Prophix One is the finance-owned platform where your strategic vision directs AI execution across planning, reporting, consolidation, and close. Others claim to be AI-enabled. Prophix takes you further.

Autonomous Finance is coming, are you ready?

Finance today	Finance with Prophix One ✓
 Siloed data	 Gain Clarity from integrated data
 Delayed decisions	 Build Capacity for real insight and business partnership
 Missed opportunities	 Lead with Confidence in every capital allocation decision

“This [AI] will significantly simplify my life. I’m frequently queried about historical data, and retrieving and interpreting it often consumes too much time. Now, I have a quick way to refresh my memory and get answers within seconds.”

Erika Jones,
Finance Reporting and Analysis Manager, Lee Company

Delivering an Autonomous Finance future with Prophix One

64% of CFOs expect autonomous finance to be reality in six years – yet fewer than 20% are using enabling technology today.*

The Prophix One Platform is making Autonomous Finance a reality.

The Prophix One AI advantage

Beyond enterprise grade security

We don't just meet standards – we exceed them. Prophix is certified by TrustArc for responsible AI use, going beyond SOC 2, Type 2, and ISO to ensure enterprise-grade protection.

Agentic AI at the core

Most AI stops at suggestions. Prophix One Agents execute tasks for you inside your workflows, reducing manual errors and freeing finance to focus on business partnership.

Explainable glass-box AI

Black-box AI creates risk. Prophix One shows every step behind the numbers, giving finance leaders audit-ready clarity and confidence in every decision.

Natively embedded intelligence

Prophix has laid the foundation, powered by Amazon Bedrock, to embed intelligence into everyday workflows across the platform.

“Prophix Copilot has become our one-stop shop for answers. I use Copilot 80-90% of the time I’m in Prophix One. It consistently makes it easy to get exactly what I need right away. It’s helped us move from reactive reporting to proactive planning. It’s streamlined the way we work and given our team more confidence, independence, and speed.”

Mandy Huynh,
Business Intelligence Analyst, KBL Environmental

Prophix Responsible AI Vision

Delivering responsible, transparent, and human-centric AI for finance leaders

Transparency

Clear when AI is used, benefits and limits explained.

Trust

Safeguarding customer data using global security and privacy standards.

Customer Control

You decide when and how to use AI.

Fairness & Equity

Bias testing, guardrails, and equitable outcomes.

Compliance

Certified by TrustArc Responsible AI – aligned with EU AI, NIST, ISO 42001, OECD

Frequently asked questions

What are Prophix One Agents?

Prophix One Agents are AI-powered teammates that handle tasks, make suggestions, fill in gaps, and operate with built-in guardrails and full traceability. Two Agents are currently available on the Prophix One Platform: the Budgeting Agent, which helps finance and budget owners update headcount, salaries, and OPEX or revenue items in plain language, and the Reporting Agent, which turns questions into instant tables, charts, and variance commentary. Together, they speed up budgeting, reporting, and insight generation by automating the manual tasks that slow finance teams down and keep budget owners reliant on FP&A.

Is my data safe and secure with Prophix One's AI capabilities?

Prophix is one of the few vendors third-party certified by TrustArc for Responsible AI. We also hold SOC 2 Type 2, ISAE 3402 Type 2, ISO 27001, ISO 27017, ISO 27018, GDPR, HITRUST CSF® R2, and Cloud Security Alliance STAR certifications. For more details see our existing security practices.

Will Prophix One Agents replace my work?

We believe Agents combine human strategy with AI execution. They are not here to replace finance teams, but to augment them and help you achieve more.
