

INTRODUCING

M7-4 PREMIUM INTEGRATED AUTOSTEER

WHY CHOOSE THE KUBOTA INTEGRATED M7-4 AUTOSTEER?

- **Increased Productivity:**
Complete fieldwork with less fatigue.
- **Cost Savings:**
Save on fuel, labour, and input costs.
- **More Precise Farming:**
Reduce waste and improve efficiency with precision applications.

KEY FEATURES

Integration

Connects to built in factory Autosteer Ready components and K-Monitor on M7-4 Premium tractors. Use tractor controls to engage steering or enable coverage mapping.

Performance

Utilizes multiple GNSS constellations. RTK upgrade option for high accuracy. New IMU sensor and improved Navigation Controller compared to previous M7 kit. Support for straight AB, Curve, or Boundary Guidance.

Support

Available through Kubota Canada dealers and existing Kubota Canada support.

Compatible

Single channel ISOBUS implement compatibility through factory M7-4 Premium tractor components. Upgrade with a GEOCONTROL License to control sections on compatible Kubota Implements.
