

ASCO's Quality Training Program

Project Title: Improving distress in breast cancer patients

Presenter's Name: Puja Arora

Institution: University of Virginia

Date: 10/18/17

Team Members

- Puja Arora, Heme/Onc Fellow, team leader/owner
- Christiana Brenin, breast oncology attending, Team Sponsor
- Joanne Phillips, breast oncology nurse navigator
- Brenda Griswold, infusion nurse
- Jennifer Kim Penberthy, clinical psychiatrist
- Christina Sheffield, cancer center distress coordinator
- Pooja Mehra, PGY-4, Oncology hospitalist,
- Ms. Schenk, patient
- Mike Keng, QI Mentor
- Amy Guthrie, QI Mentor

Institutional Overview

- Located in Charlottesville, Virginia and serves a mostly rural population across a large geographical area. This includes Northern Virginia, central Virginia, the western part of Virginia as well as eastern portions of West Virginia and Tennessee.

Institutional Overview

- Academic, NCI-designated cancer center and a tertiary referral center.
- Patient volume of 350-400 patients a week
- Group of 20 oncologists sub-specializing in hematological malignancies, GI, breast, lung, GU, head and neck, and skin cancers

Baseline Measures

- Measure: The screening and documentation of distress
- Patient population: Breast cancer patients who present as a second visit
- Calculation methodology:
 - Numerator: Number of breast cancer patients who are screened by the electronic screening tool and proper documentation by RN is completed
 - Denominator: Total number of breast cancer patient presenting for a second visit
- Data source: Cancer center RN manager provided access to program that allows you to see all second visits by clinic-
http://hstsbissrst/HSCSDS_SSRS/Pages/ReportViewer.aspx?%2fTom+-+Testing%2fCancer+Center+Second+Visits&rs:Command=Render
- Data collection frequency: once a week
- Data quality(any limitations): Cannot capture those whom survey was offered but lost, those who refused to fill survey

Baseline Data

- 36 second visit breast cancer patients were identified from February 1st- March 31st
- 3 patients had a distress thermometer scanned into epic
- 0 had a documented note
- 0 Required a referral to be placed
- 0 Referral was placed
- 0 Appointments were made after referral placed
- Appointments took place and intervention provided

NCCN Distress Thermometer for Patients

SCREENING TOOLS FOR MEASURING DISTRESS

Instructions: First please circle the number (0-10) that best describes how much distress you have been experiencing in the past week including today.

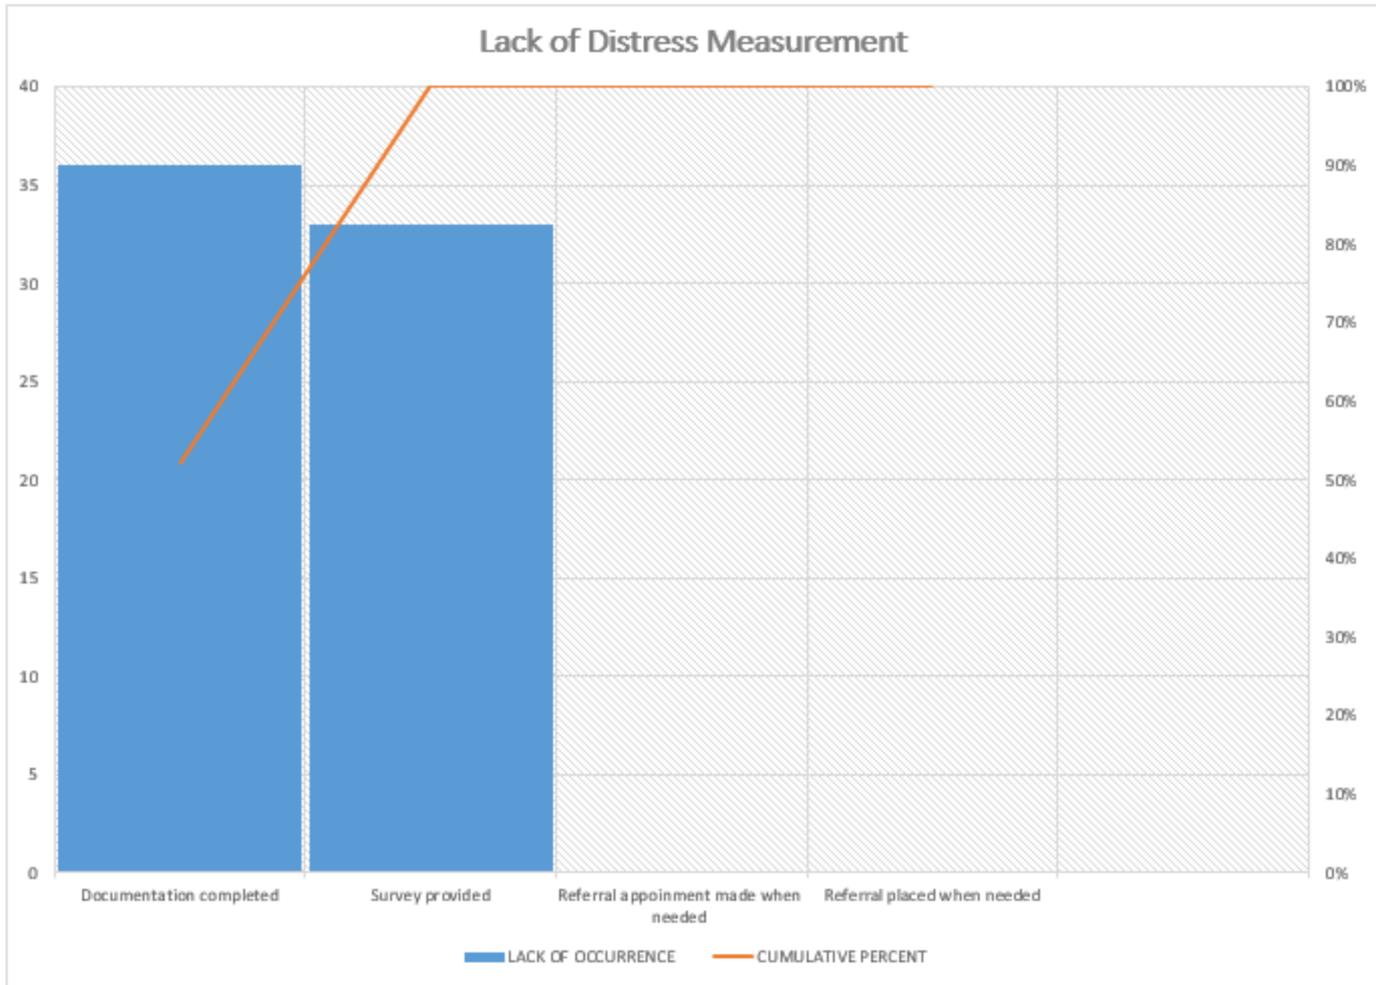

Extreme distress 10
9
8
7
6
5
4
3
2
1
0
No distress

Second, please indicate if any of the following has been a problem for you in the past week including today. Be sure to check YES or NO for each.

| YES | NO | Practical Problems | YES | NO | Physical Problems |
|--------------------------|--------------------------|--------------------------------------|--------------------------|--------------------------|------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | Child care | <input type="checkbox"/> | <input type="checkbox"/> | Appearance |
| <input type="checkbox"/> | <input type="checkbox"/> | Housing | <input type="checkbox"/> | <input type="checkbox"/> | Bathing/dressing |
| <input type="checkbox"/> | <input type="checkbox"/> | Insurance/financial | <input type="checkbox"/> | <input type="checkbox"/> | Breathing |
| <input type="checkbox"/> | <input type="checkbox"/> | Transportation | <input type="checkbox"/> | <input type="checkbox"/> | Changes in urination |
| <input type="checkbox"/> | <input type="checkbox"/> | Work/school | <input type="checkbox"/> | <input type="checkbox"/> | Constipation |
| <input type="checkbox"/> | <input type="checkbox"/> | Treatment decisions | <input type="checkbox"/> | <input type="checkbox"/> | Diarrhea |
| | | | <input type="checkbox"/> | <input type="checkbox"/> | Eating |
| | | | <input type="checkbox"/> | <input type="checkbox"/> | Fatigue |
| <input type="checkbox"/> | <input type="checkbox"/> | Family Problems | <input type="checkbox"/> | <input type="checkbox"/> | Feeling Swollen |
| <input type="checkbox"/> | <input type="checkbox"/> | Dealing with children | <input type="checkbox"/> | <input type="checkbox"/> | Fevers |
| <input type="checkbox"/> | <input type="checkbox"/> | Dealing with partner | <input type="checkbox"/> | <input type="checkbox"/> | Getting around |
| <input type="checkbox"/> | <input type="checkbox"/> | Ability to have children | <input type="checkbox"/> | <input type="checkbox"/> | Indigestion |
| <input type="checkbox"/> | <input type="checkbox"/> | Family health issues | <input type="checkbox"/> | <input type="checkbox"/> | Memory/concentration |

PROBLEM DATA

| PROBLEM AREA | LACK OF OCCURREN | PERCENT | CUMULATIVE PERCENT |
|------------------------------|------------------|---------|--------------------|
| Documentation completed | 36 | 52.17% | 52.17% |
| Survey provided | 33 | 47.83% | 100.00% |
| Referral appointment made wt | 0 | 0.00% | 100.00% |
| Referral placed when needed | 0 | 0.00% | 100.00% |

Baseline Data

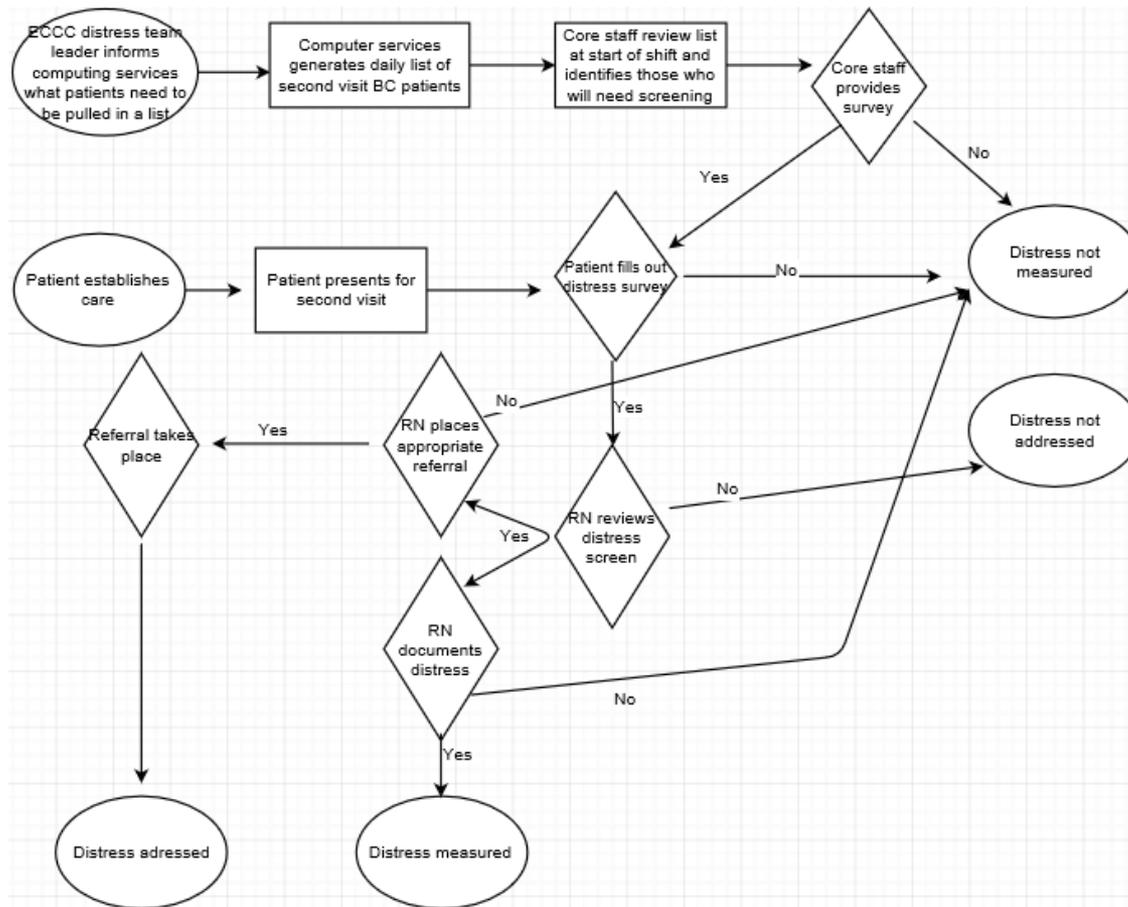

**Distress Measurement in Breast Cancer Patients,
February 1st-March 31st 2017**

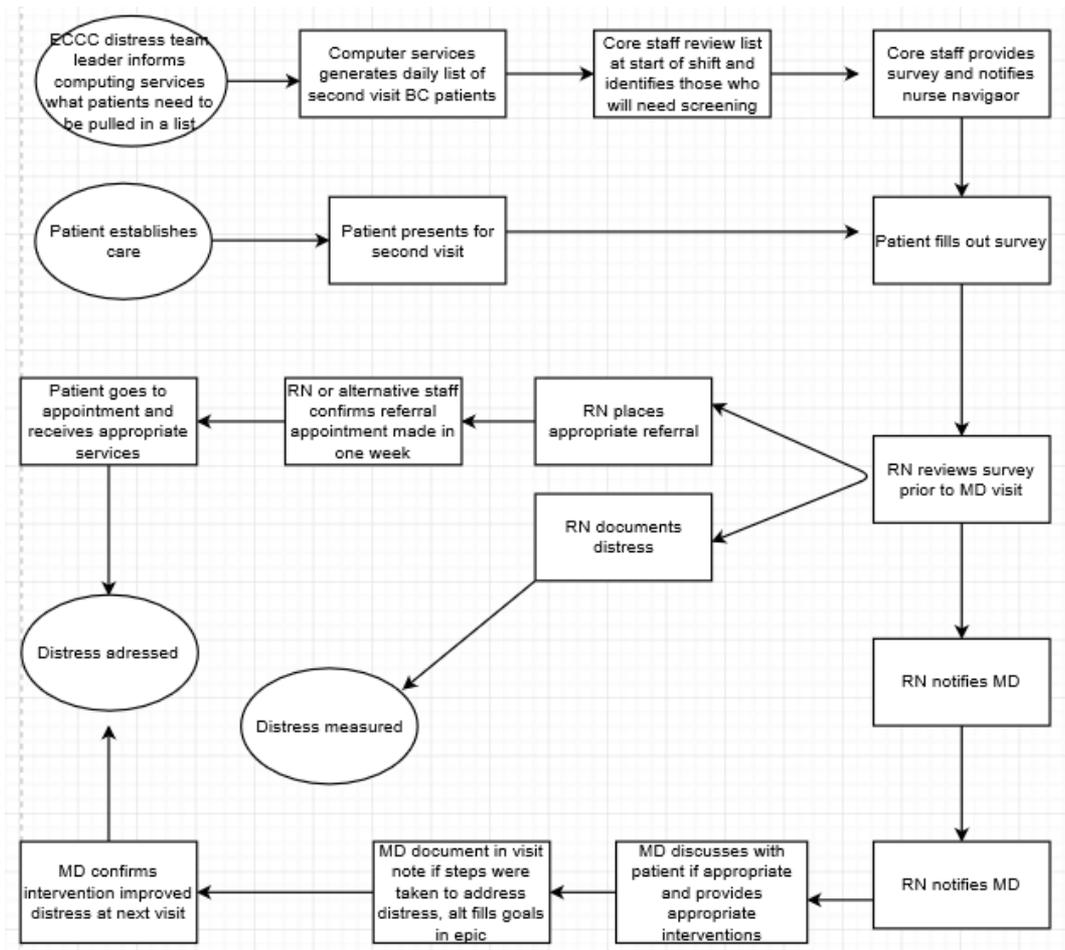

Problem Statement

- From February 1st to March 31st 2017, the UVA Cancer Center assessed distress in just 13% of their breast cancer patients seen on their second visit, leading to a lack of timely communication and intervention with patients in distress along with not meeting of the Commission on Cancer's accreditation requirements.

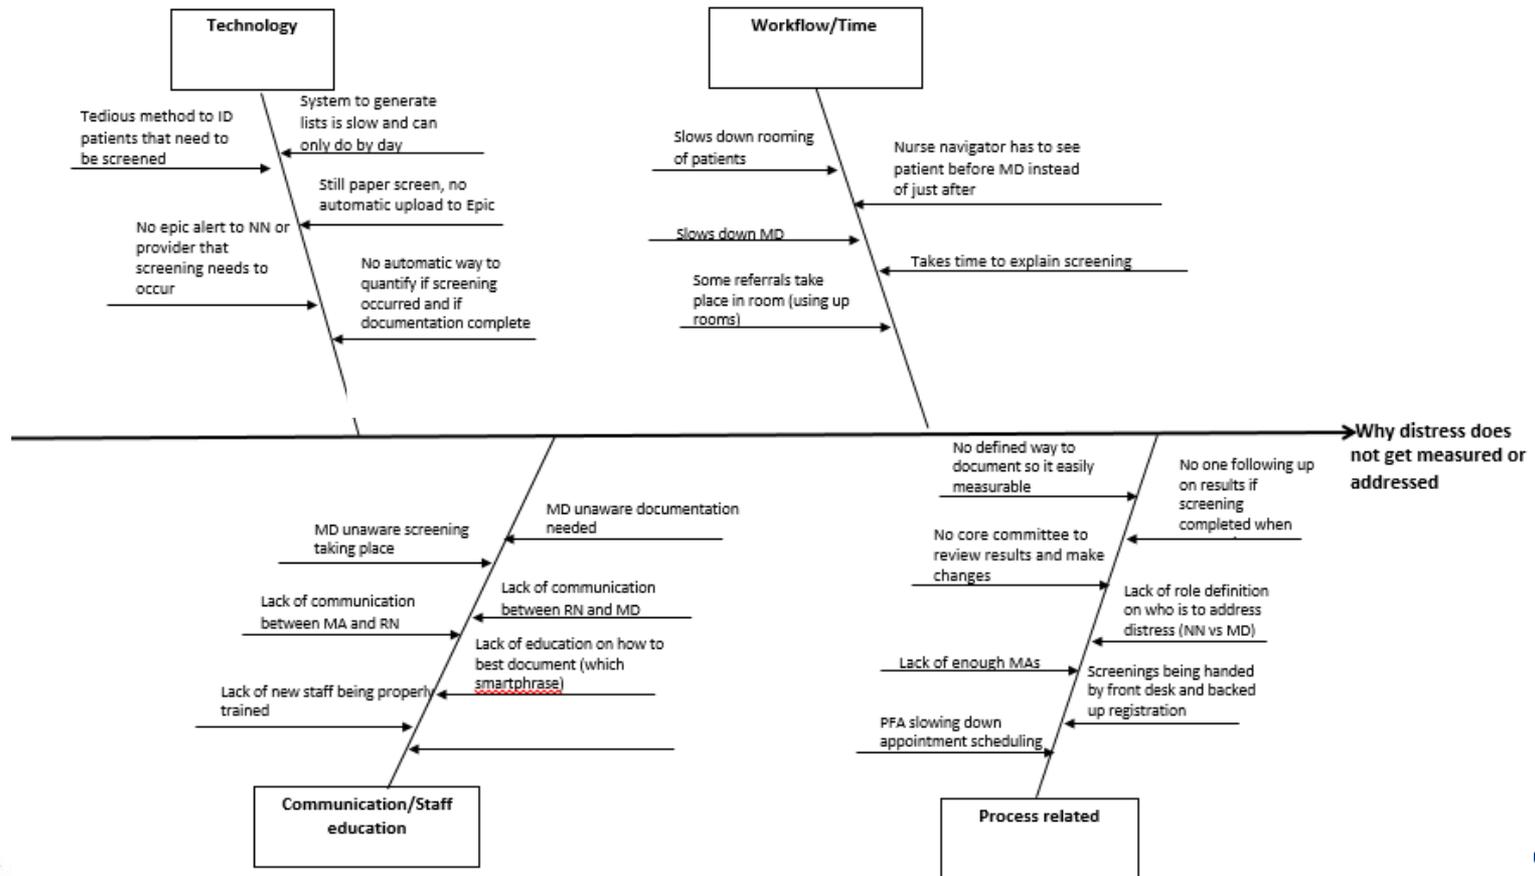

Process Map- Current

Process Map- Ideal

Cause & Effect Diagram

Aim Statement

By October 2017, increase the measurement of distress in breast cancer patients to 90%.

PDSA Plan

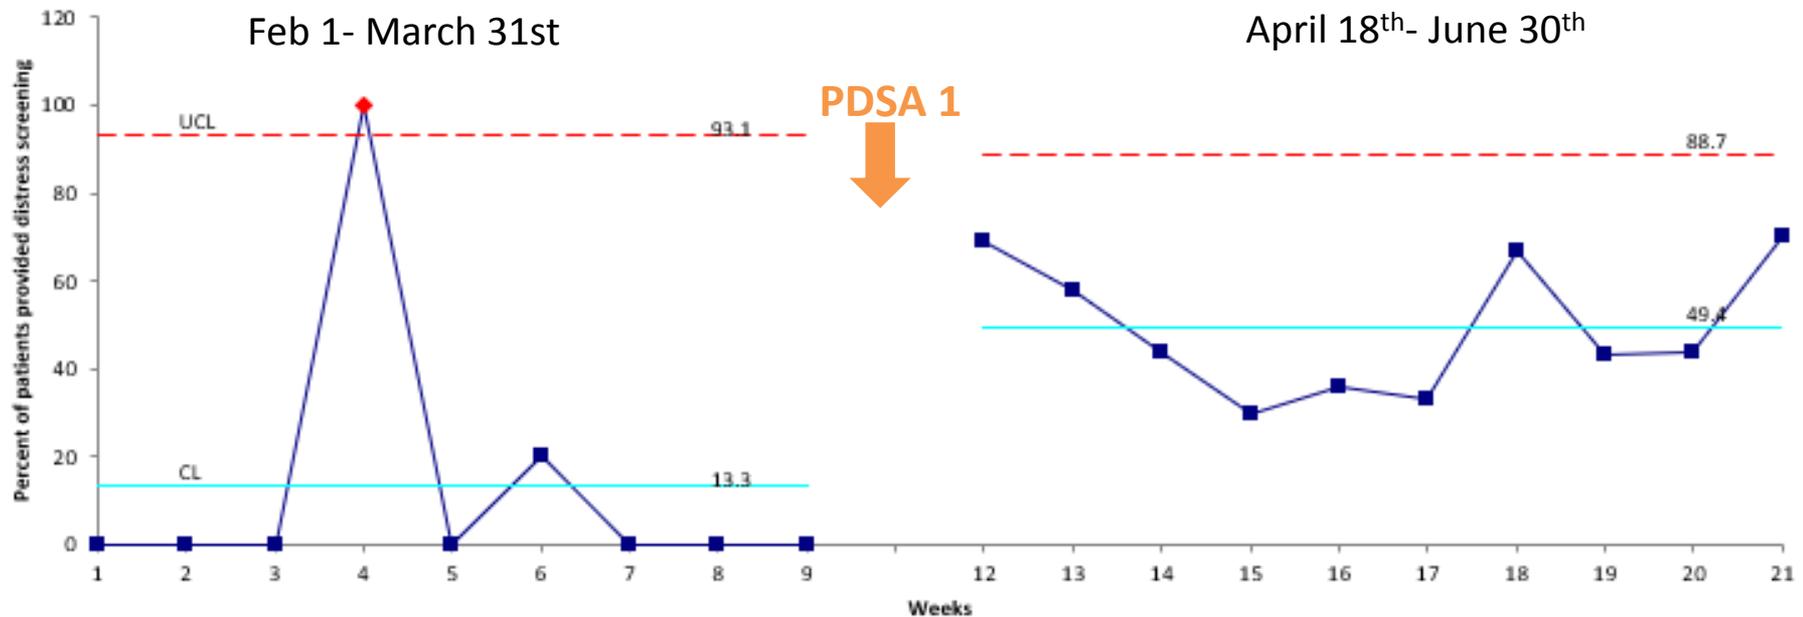

| Date of PDSA cycle | Description of intervention | Results | Action Steps |
|--------------------|--|---------|--------------|
| April- May 2017 | <ul style="list-style-type: none">• Created a distress committee with point person who was going to look at the data week to week• Create a dot phrase in epic to be used by all nurse coordinators to document distress findings | | |
| | | | |

Data from PDSA Cycle 1

- 112 second visit breast cancer patients were identified from April 18th- June 30th
- 59 had a distress thermometer scanned into epic
- 40 had a documented note
- 13 Required a referral to be placed
- 12 Referral was placed
- 9 Appointments were made after referral placed
- 4 Appointments took place and intervention provided

| Date of PDSA cycle | Description of intervention | Results | Action Steps |
|--------------------------|---|--|---|
| April- June 2017 | <ul style="list-style-type: none"> Created a distress committee with point person who was going to look at the data week to week Create a dot phrase in epic to be used by all nurse coordinators to document distress findings | <ul style="list-style-type: none"> Improvement from 13% to 49% of patients screened Improvement in documentation from 0 to 36% | <ul style="list-style-type: none"> Will continue with committee and leader Continue dot phrases but will provide further teaching on how to use |
| September - October 2017 | <ul style="list-style-type: none"> Implement electronic surveys via ipads which allow for automatic upload to EMR for all to see Electronic survey is more comprehensive | <ul style="list-style-type: none"> Improvement from 49% to 83% of patients screened Improvement in documentation from 36% to 71% | <ul style="list-style-type: none"> Continue use of ipads |

Conclusions

- Measurement of distress improved with a team leader driving the initiative and making the process more automatic with incorporation of the electronic surveys via ipads
- Continued education on why distress is being measured and how to best incorporate into the work-flow is needed
- Did not meet aim of 90%, but close

Future Measures

Outcome Measures:

- Percentage of patients receiving distress screening
- Percentage of patients with distress screening documentation
- Number of referrals placed to address distress

Process Measures:

- How often data is being analyzed when collected
- How many cases are monitored weekly
- Wait time for ipads
- How long it takes for second visits to be identified and provided to core staff

Operational Measures:

- Length of patient visits
- Length of time to room patients
- Delay in clinic schedules
- Patient satisfaction with survey

Sustainability

- RN manager who has distress screening as one of his/her job descriptors
- Every 3 month check-ins with core staff and nurse navigators
- Incorporating MDs once work flow established

Thank You
