

# ASCO's Quality Training Program

**Project Title:** Creating a Safer Medical Record:  
ICD code entered and correct

**Presenter's Name:** Thamine Lessa,  
Nelson Pestana,  
Álvaro Machado

**Institution:** Clínica AMO

**Date:** October 4<sup>th</sup>, 2017

- Clínica AMO is a private practice located in the state of Bahia, Brazil.
- Founded in 1994, now there are 7 units with 125 doctors of 20 different specialties and over 240 employees.
- > 58,000 medical appointments and > 22,500 chemotherapy sessions in 2016

# Team Members

**Team Leader:** Thamine Lessa, MD - Pneumologist

**Team Members:**

- Nelson Pestana, CEO
- Álvaro Machado, BPharm
- Adriana Alves, Nurse Manager
- Maria Dias, MD – Hematologist
- Paulo Amaral, MD – Surgeon
- Caio Silverio, MD – Oncologist
- Olga Neves, Administrator
- Elder Pimenta, IT Manager
- Mariane Machado, Nurse

**Project Sponsors:** Carlos Sampaio, MD, President of Clínica AMO; Nelson Pestana, CEO of Clínica AMO.

# Problem Statement

In 2016 at AMO, **20.7%** of our patients following the third visit have missing or incorrect ICD documentation in the appropriate field in the electronic medical record (EMR). This leads to lack of coordination amongst the multidisciplinary team and inconsistencies in data gathering and analysis focused on clinical research and management.

# Applying the ICD Code

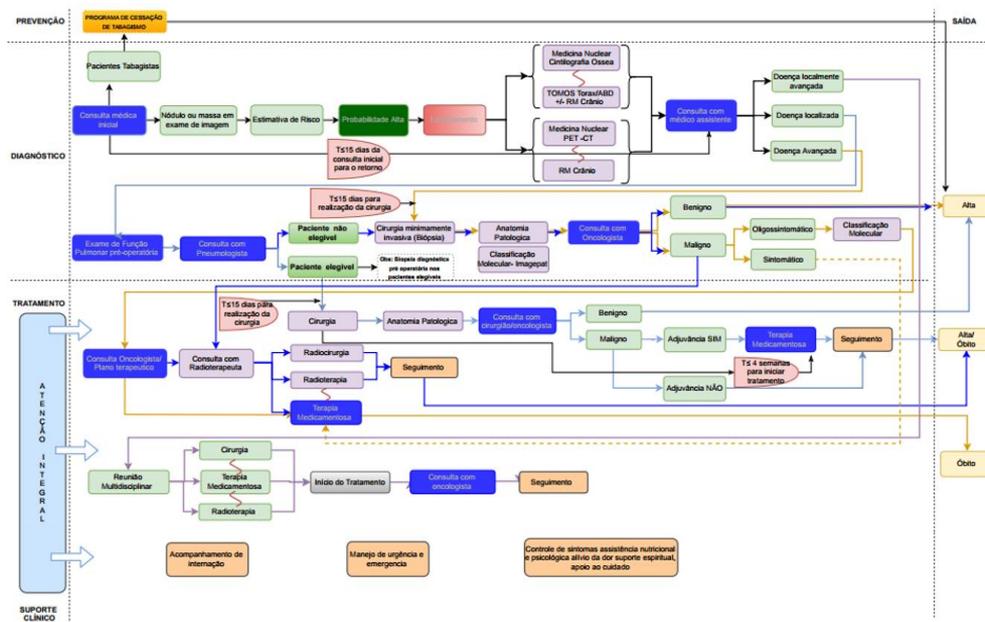

Chosen eligible ICDs for monitoring:  
E.g. R91 (Thoracic Mass)

When correct documented in EMR

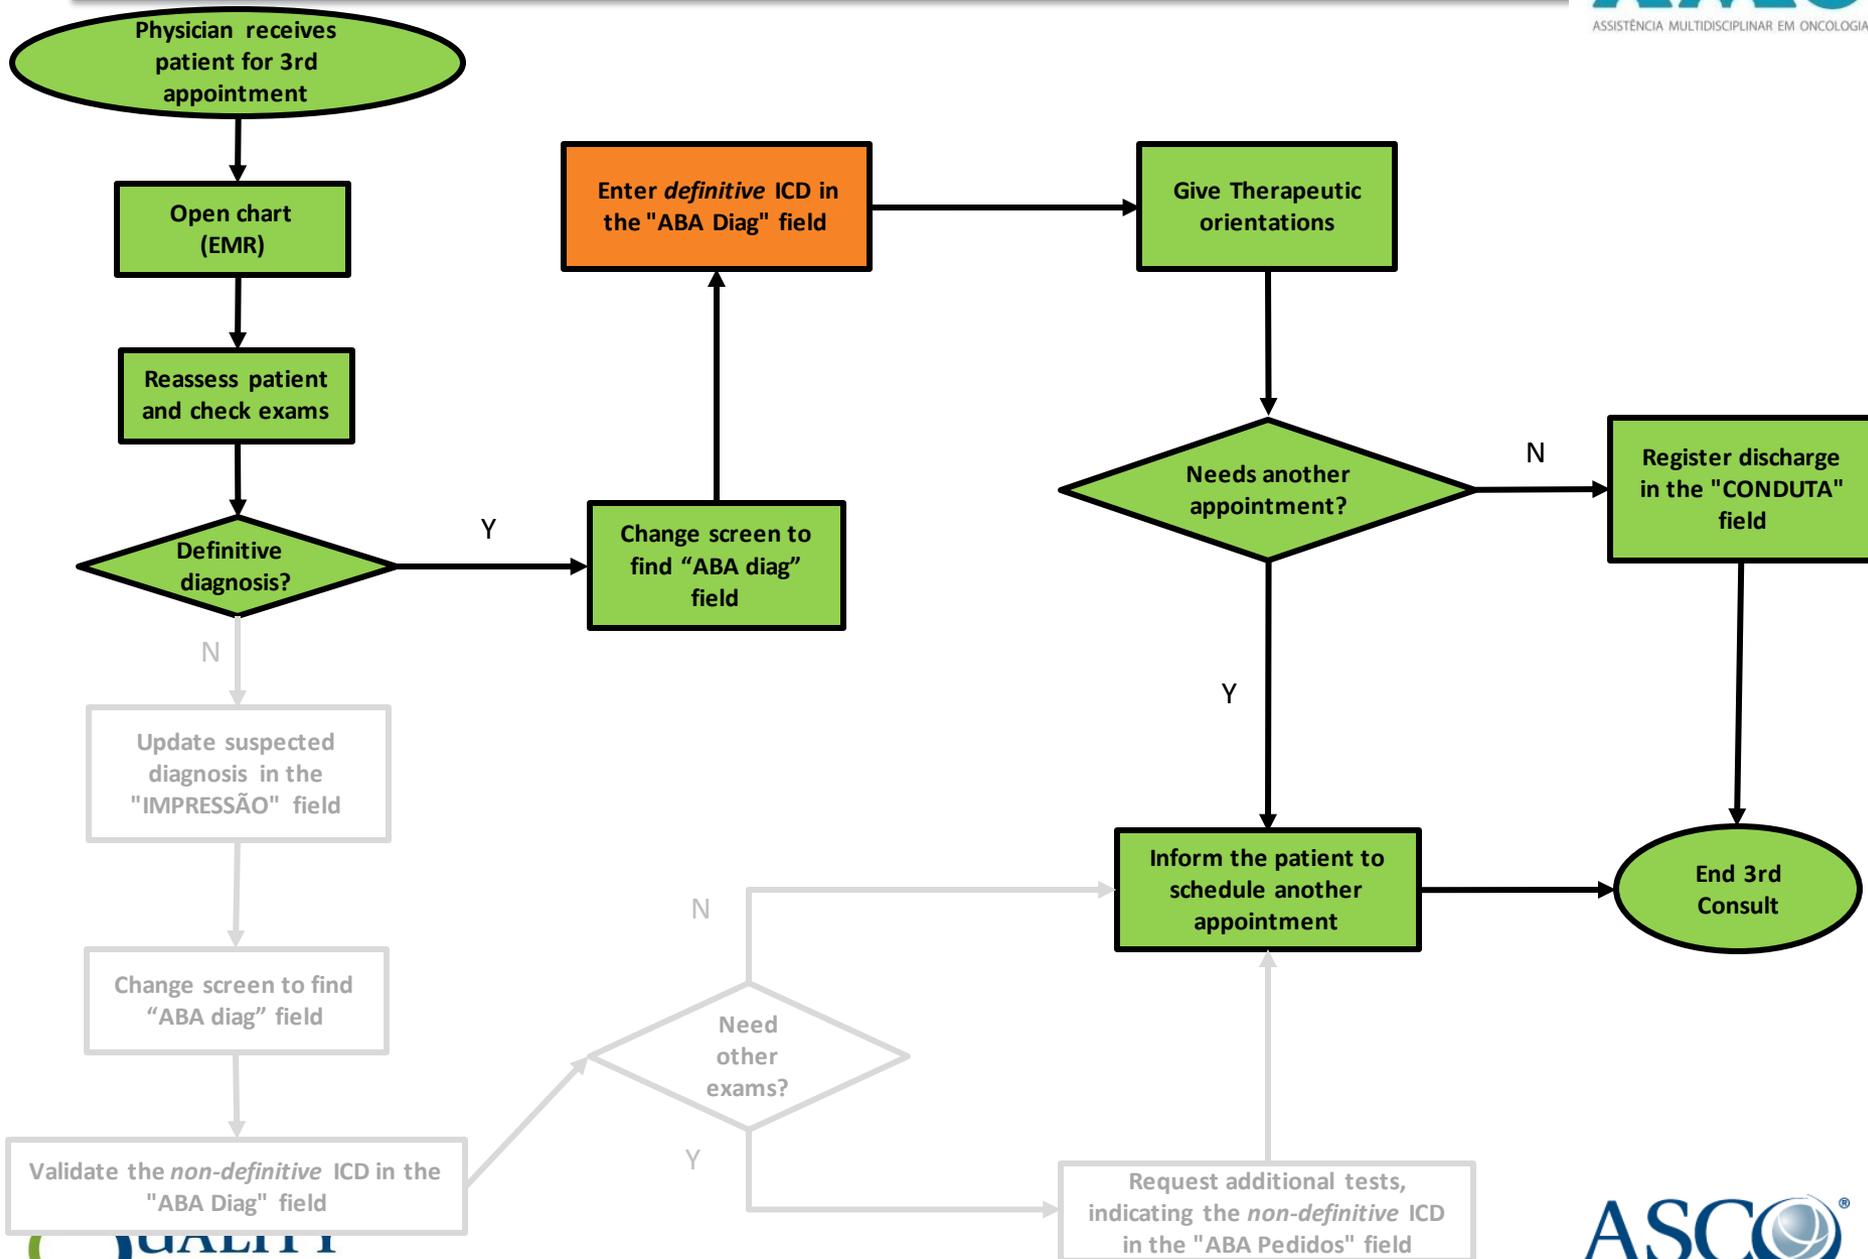

Patient automatically starts on the Line of Care and begins being monitored by the multidisciplinary team

Log the time between each and every events (E.g. From diagnosis to surgery)

## Line of Care for Thoracic Oncology (High Probability of Lung Cancer)

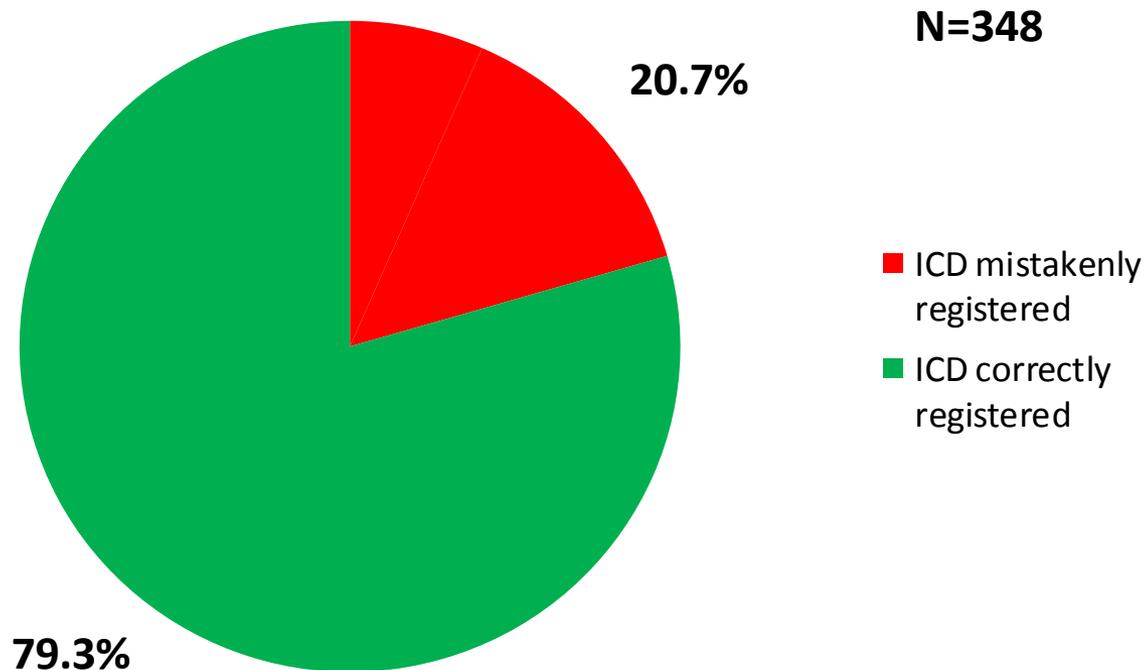

# Process Map

# Baseline Data

## ICD appropriate documentation analysis

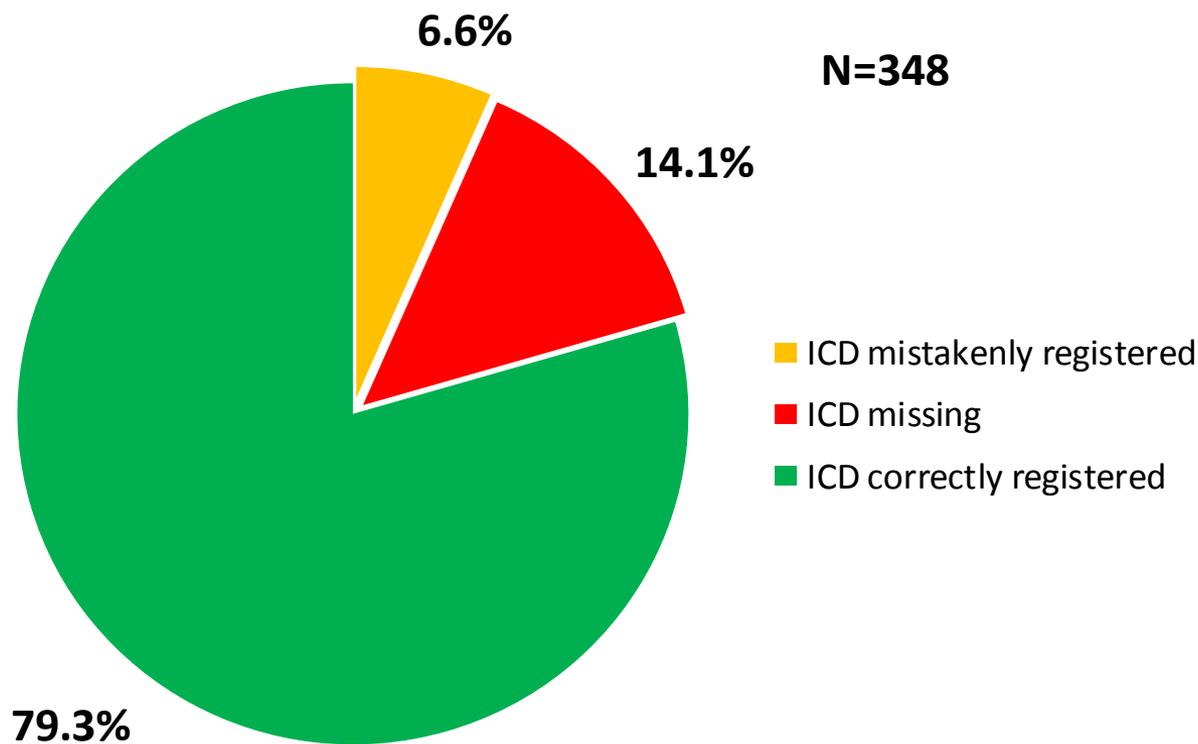

Audit of patients with 3 consults

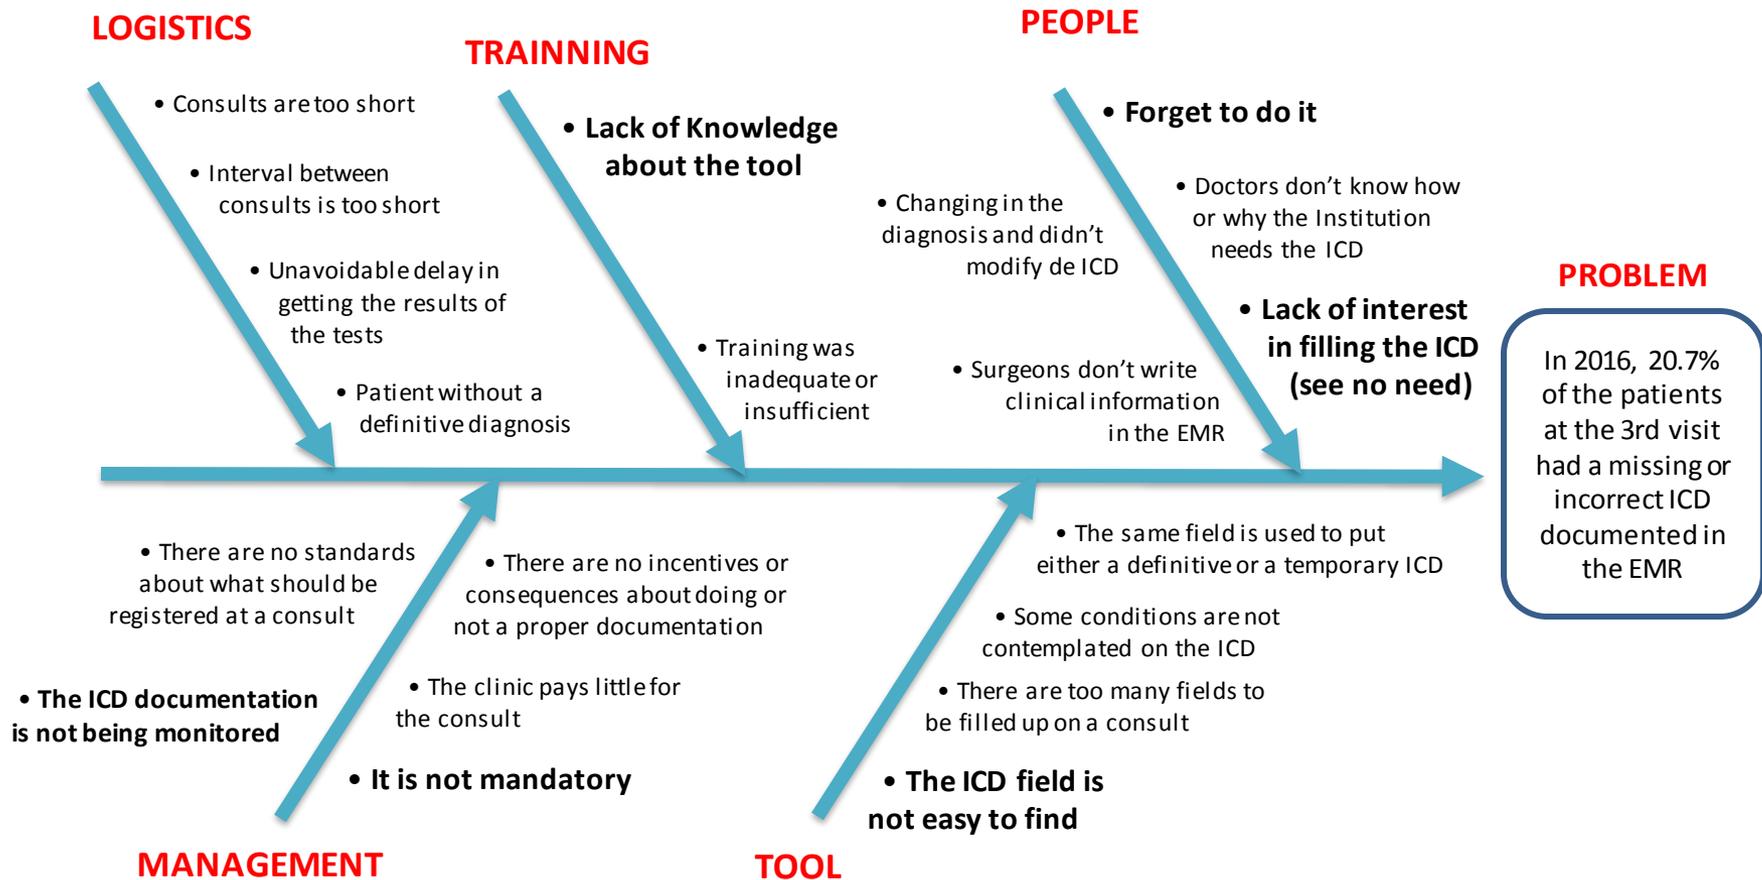

# Baseline Data

## ICD appropriate documentation analysis

Audit of patients with 3 consults

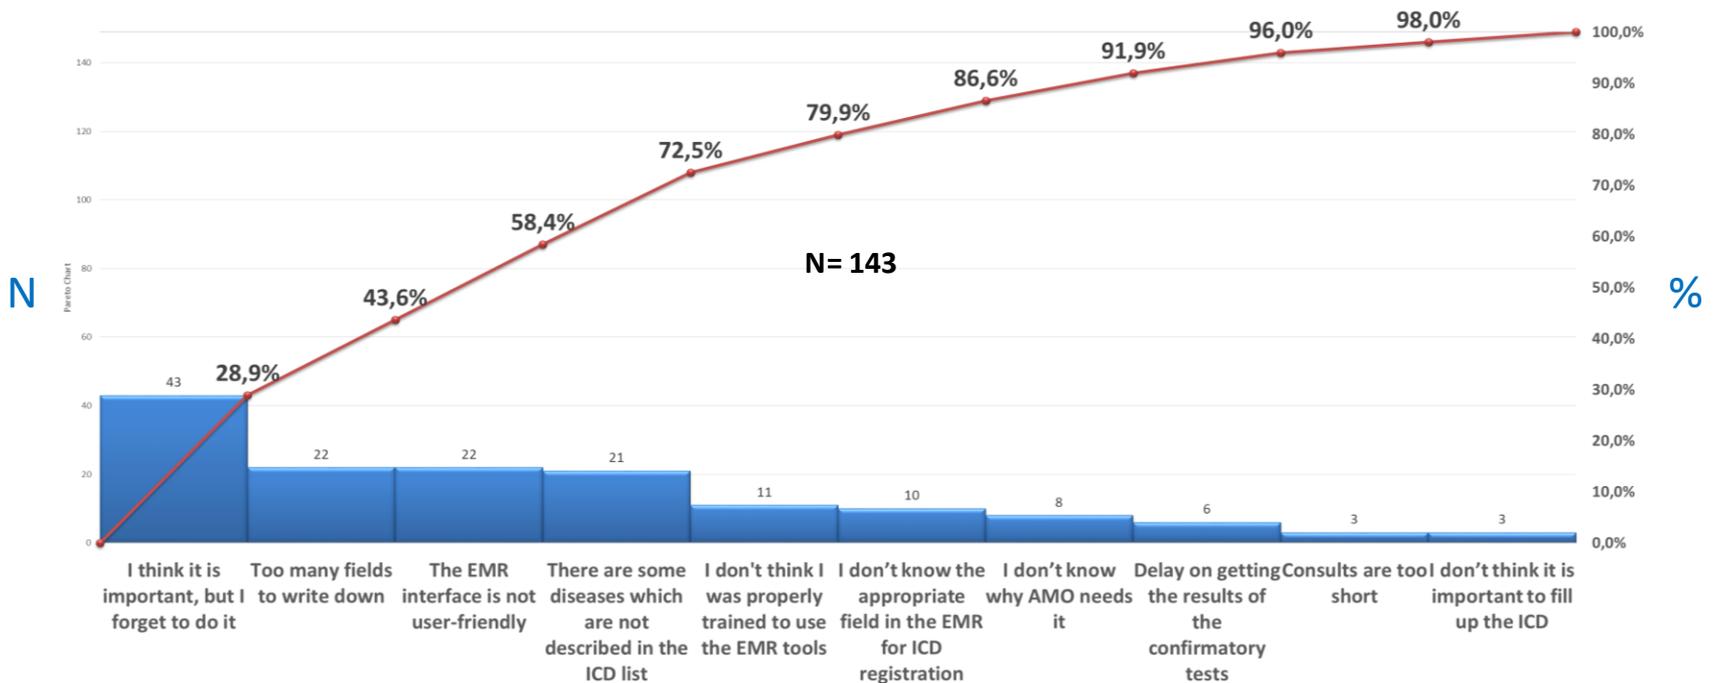

# Cause & Effect Diagram

# Diagnostic Data

Pareto Chart

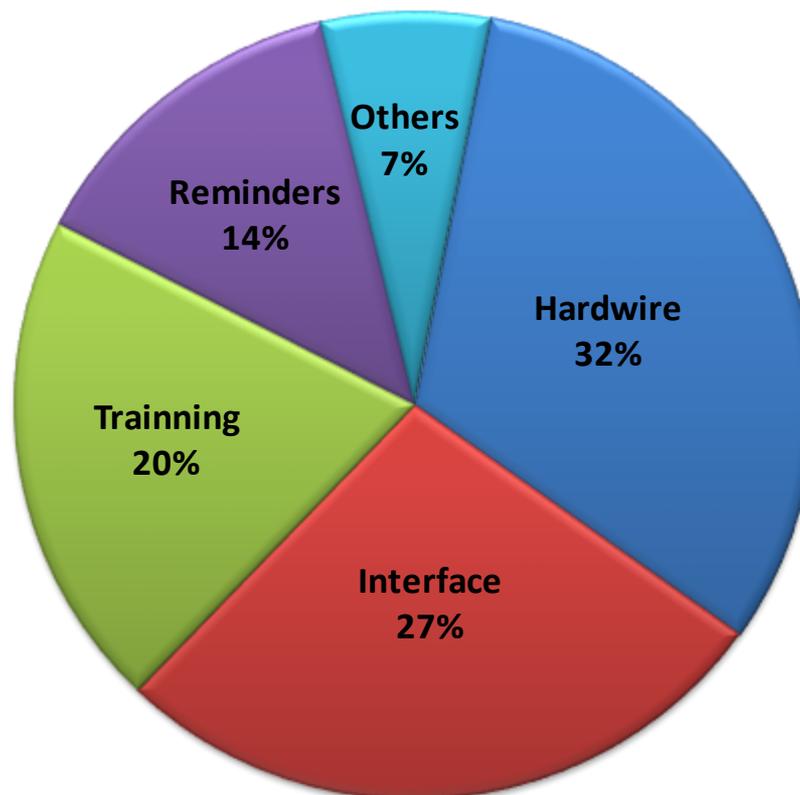

Main reasons not to document ICD

# Diagnostic Data

## Actions Suggested

N= 143

# Aim Statement

Reduce the percentage of missing or incorrect ICD documentation following the 3<sup>rd</sup> consult to 5% within 6 months

# Measures

- **Measure:** Outcome - % of patients with correct ICD registered in the proper field in the EMR
- **Patient population:** Patients with 3 office appointments with his/her doctors
- **Calculation methodology:** Patients with 3 appointments with proper ICD registered in the ICD field / Total of patients with 3 appointments
- **Data source:** EMR
- **Data collection frequency:** Every 1/3/6 months
- **Data quality(any limitations):** Potential for human error; Sample size.

# Prioritized List of Changes (Priority/Pay –Off Matrix)

<b>Impact</b>  	<b>High</b>	<ul style="list-style-type: none"> <li>• Move ICD FIELD from supplementary form to the main form</li> </ul>	<ul style="list-style-type: none"> <li>• Educate doctors on why ICD matters</li> <li>• Establish mandatory nursing consults prior to medical appointment</li> <li>• Make ICD mandatory after 3<sup>rd</sup> consult</li> <li>• Put electronic reminders on EMR</li> </ul>
	<b>Low</b>	<ul style="list-style-type: none"> <li>• Additional training for doctors on how to document ICD in the EMR</li> <li>• Create individual reports of compliance to give feedback to the doctors</li> </ul>	

**Implementation**

# PDSA Plan (Test of Change)

Date of PDSA Cycle	Description of Intervention	Results	Action Steps
August 22 <sup>nd</sup>	Move ICD FIELD from supplementary form to the main form	Completed	<ul style="list-style-type: none"> <li>• Get approval from the Chart Commission</li> <li>• Design the change on the form</li> <li>• Implement change</li> <li>• Communicate doctors</li> </ul>
August 22 <sup>nd</sup> -September 4 <sup>th</sup>	Education actions towards showing importance of ICD and correct documentation	Completed	<ul style="list-style-type: none"> <li>• Sent e-mail with orientations</li> <li>• Reinforced importance of ICD documentation during weekly meetings with doctors</li> </ul>
August 22 <sup>nd</sup> -September 29 <sup>th</sup>	IT staff coaching	Completed	<ul style="list-style-type: none"> <li>• IT staff working one-on-one with doctors in clinic to coach and answer questions about ICD documentation</li> </ul>

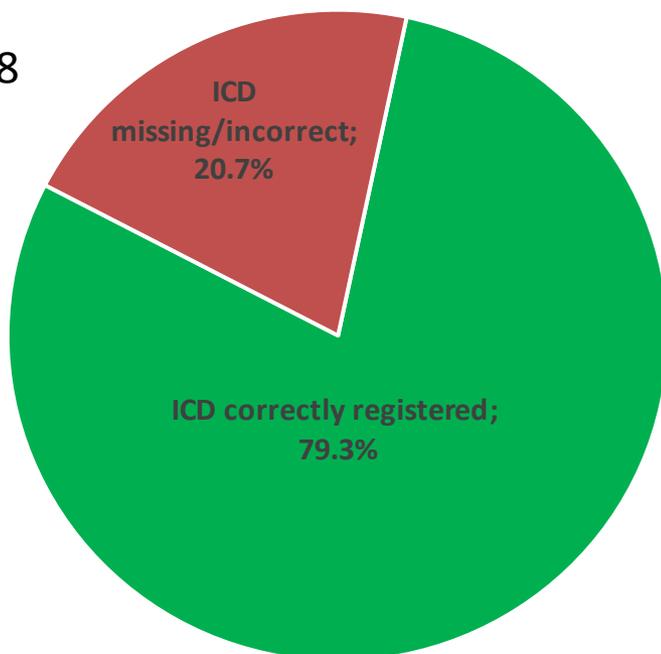

# PDSA Plan (Test of Change)

Date of PDSA Cycle	Description of Intervention	Results	Action Steps
August 22 <sup>nd</sup> - December	Make ICD mandatory in the EMR from 3 <sup>rd</sup> appointment and beyond	TBD	<ul style="list-style-type: none"> <li>Request made to software company</li> </ul>
August 22 <sup>nd</sup> - December	Put electronic reminders on EMR	TBD	<ul style="list-style-type: none"> <li>Request made to software company</li> </ul>
August 22 <sup>nd</sup> - November	Create individual reports of compliance to give feedback to the doctors	TBD	<ul style="list-style-type: none"> <li>Request made to internal IT development team</li> </ul>

# Change Data

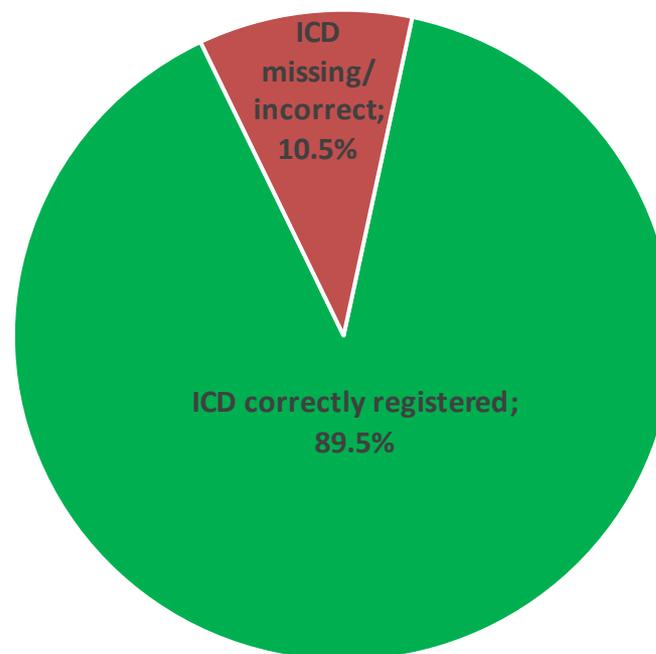

Baseline Data

N= 348

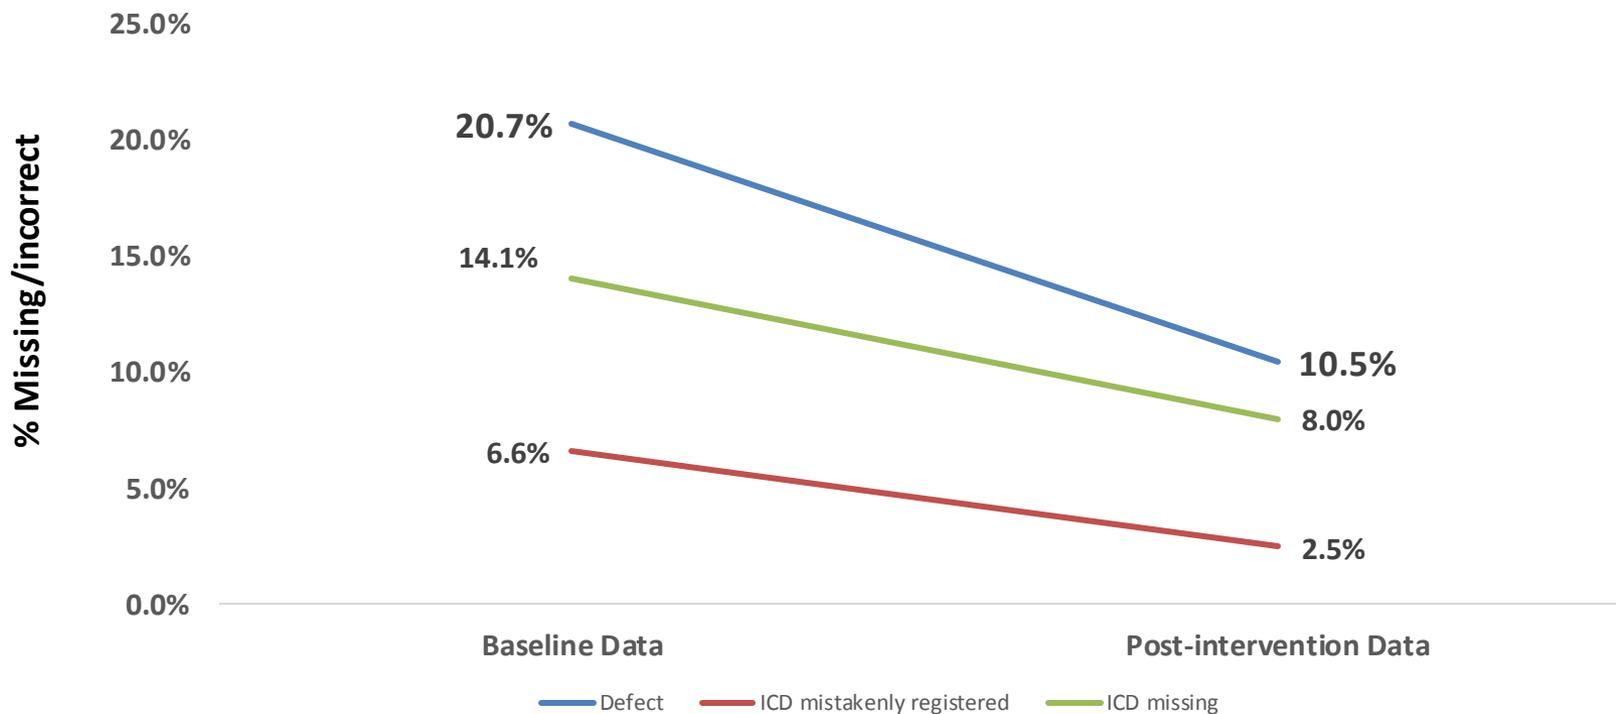

Post-Intervention Data

N= 325

# Change Data

ICD documentation comparison

# Conclusions

- Despite we did not yet reach our goal, we reduced error rate by 45.8%;
- It was very helpful to have a multidisciplinary team and to include all doctors in the analysis and generating solutions;
- The fact that we were able to reduce by half the defects with only three easy to implement actions makes us very confident to apply this methodology in order to solve many other problems;
- We improved the consistency of an importante parameter our database;

# Next Steps/Plan for Sustainability

- Implement additional actions as planned on the beginning;
- Measure the results over time
- Apply the methodology to other problems in our institution

## Creating a safer Medical Record – ICD entered and correct

**AIM:** Reduce the percentage of missing or incorrect ICD registration up to the 3rd consult to 5% in within 6 months

### INTERVENTION:

- Change the local where the doctors shall input the ICD on EMR, because it was located in a place that was not easy to remember, and many doctors suggested that change;
- The medical director sent some e-mails to the doctors about the importance of putting the appropriate ICD in the correct field of the EMR
- The medical director used his weekly meeting with the doctor to talk about the correct way to register ICD and why it is important to the institution
- IT staff became available at the office's floor for a month to help doctors with any difficulties they might have in using the EMR properly

### TEAM:

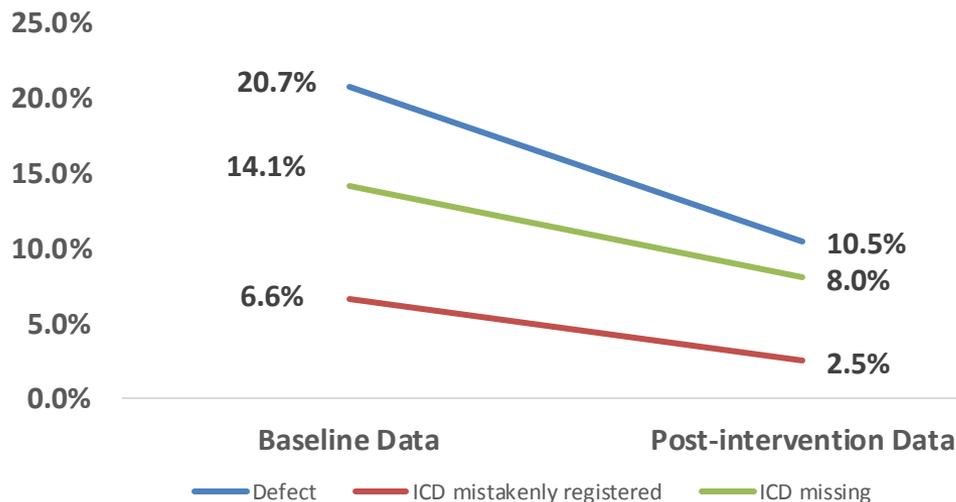

- Nelson Pestana, CEO;
- Álvaro Machado, BPharm;
- Adriana Alves, Nurse Mngr
- Maria Dias, MD
- Paulo Amaral, MD
- Caio Silverio, MD
- Olga Neves, Administrator
- Elder Pimenta, IT manager
- Mariane Machado, Nurse
- Thamine Lessa, MD

### PROJECT SPONSORS:

- Carlos Sampaio, President of AMO

### RESULTS:

ICD documentation comparison

### CONCLUSIONS:

- Although we did not yet reach our goal, we reduced error rate by 45.8%;
- It was very helpful to have a multidisciplinary team and to include all doctors in the analysis and generating solutions;
- The fact that we were able to reduce by half the defects with only three easy to implement actions makes us very confident to apply this methodology in order to solve many other problems;
- We improved significantly the consistency of our database;

### NEXT STEPS:

- Implement additional actions as planned on the beginning;
- Measure the results over time
- Apply the methodology to other problems in our institution
