ASCO[®] CENTRA

Center for Research & Analytics

1. Data generated by an external informatics company based on genomic test results uploaded by clinical sites.
2. Physical exam includes height, weight, blood pressure, pulse, temperature, and ECOG performance status. Height is only recorded in baseline data set.
3. Laboratory values include complete blood count with differential, platelets, and serum chemistries.
4. Tumor assessments taken at Baseline will be repeated every 8 weeks for the first 16 weeks after the Baseline Assessment & Cycle 1 Day 1 Visit, then every 12 weeks thereafter.
5. Dose modifications are allowed at the discretion and clinical judgment of the treating physician, informed by the protocol and approved package insert for the study drug.
6. All reportable AE/SAEs will be included in the data set.
