

Dental Plan Features:

Early Ortho Max Extender

With our Early Ortho Max Extender, your clients' orthodontic coverage can include an enhanced benefit compared to typical plans, helping them stretch their orthodontic maximum even further and unlock more coverage when they need it most.

How it Works:

With our Early Ortho Max Extender, your clients' orthodontic coverage can include an enhanced benefit compared to typical plans, helping them stretch their Orthodontic Maximum. Enrollees will then have more money to put towards their Orthodontic Maximum when those treatments are needed.

Example:

Let's say a plan has a \$1,500 Orthodontic Maximum. If a member were to receive an eligible early orthodontic service that costs \$350, it would typically reduce the maximum available for future, more comprehensive orthodontic treatment.

\$1,500 - \$350 = \$1,150 Remaining

If these services counted toward a \$1,500 Orthodontic Maximum, only \$1,150 would remain. However, the Early Ortho Max Extender means the full \$1,500 is still available! **It would be like your orthodontic maximum had been \$1,850!**

Enrollees will be able to take advantage of a variety of early orthodontic services without compromising their Orthodontic Maximum.

Renaissance **Dental Plans:**

- 1 Complements our Orthodontic Reset plan feature for even better coverage
- 2 Combined national and regional network with over 450,000 dental access points*
- 3 Enhanced coverage for individuals with certain high-risk medical conditions
- 4 Ability to bundle with vision, life, and disability plans for a more complete solution
