

SWIM AT HOME™

ENDLESS POOLS®

A Complete Line of Pools to Suit Your Lifestyle.

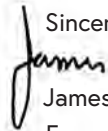

The inspiration for the Endless Pools technology arose more than 80 years ago in Arizona. As a boy, my father swam in place against the flow of the irrigation canals that brought Colorado River water to Phoenix. He and I talked for years about building a machine to swim at home – a machine that would simulate open-water swimming in a small space.

I built the first Endless Pools model on the pool deck at Columbia University in 1985. Though only a rough prototype, that pool still amazed the swimmers as they realized that you really could swim in place. The benefits of immediate feedback for them and their coaches were clear even then.

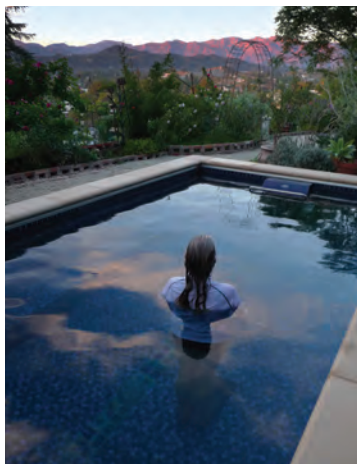

The therapeutic uses of the pool were also obvious to us quite early on. My first customer explained to me the benefits of aquatic exercises for people with multiple sclerosis. Later, his neighbor purchased our fourth pool for her rheumatoid arthritis.

Tens of thousands of Endless Pools installations later, those benefits continue and even more have emerged. Along the way, we have evolved our design, catering to our clients' varied needs and budgets. The pools and fitness systems presented in the following pages can be adapted to any aesthetic preference and can help you meet almost any fitness, wellness, or lifestyle goals. All feature the ease of installation on which we've come to pride ourselves.

For my father, swimming in place meant freedom and simplicity. Any one of our Endless Pools models can deliver just that – and more – to your home: a compact, personal pool that's heated to the temperature you select, flexible enough to fit almost anywhere, and durable enough to provide you with many years of health, fitness, and recreation.

Sincerely,

 James Murdock

Outdoor Retreat

Indoor Sanctuary

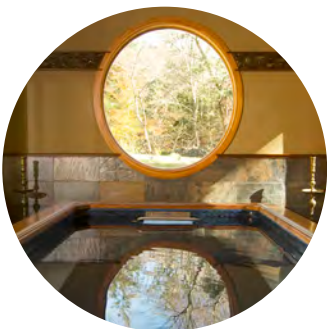

ENDLESS POOLS® ORIGINAL SERIES

- Compact, modular construction lets you install indoors or out, even in existing spaces. All components fit easily through doors and down stairs.
- Economical to use year-round, thanks to its energy efficient pump and compact structure.
- Beautiful because you determine the aesthetic. Choose from multiple models, with a range of sizes, depths, and numerous finishing options to suit your taste and budget.

ENDLESS POOLS® FITNESS SYSTEMS

- Two-in-one design lets you enjoy both a refreshing massage and a fully adjustable swim current for swimming or resistance exercise.
- Easy installation on any sound, level surface. Perfect for outdoors, a converted garage, or new construction.
- Multiple models to fit just about any space.

Great for tight, cramped spaces

Easy to install, simple to maintain

Relax in sculpted jet seats

Quicker therapy and rehab results

THE ORIGINAL

The dream of swimming at home starts here.

Our signature pool is so compact that it's simple to maintain and affordable to heat year-round. Yet its state-of-the-art current makes it feel as long as a river; you can swim 'endlessly,' without ever making a flip turn. It's the biggest pool you'll ever need.

Install it indoors or out, in your backyard or basement, in a greenhouse or garage, in a courtyard or a corner, with customizable sizing, the pool adapts to your space.

With your choice of swim currents (turn the page for details) you can have exactly the swim experience you want. It's fully adjustable to meet your goals and those of everyone in your household.

ENDLESS POOLS FIT@HOME® APP

Take your exercise to the next level with our new Endless Pools Fit@Home app/kit. The app allows you to control the pace and duration of your Original Series pool using any smart device. It also acts as a smart display allowing you to see your swim speed and duration while in the pool.

Bring the dream home

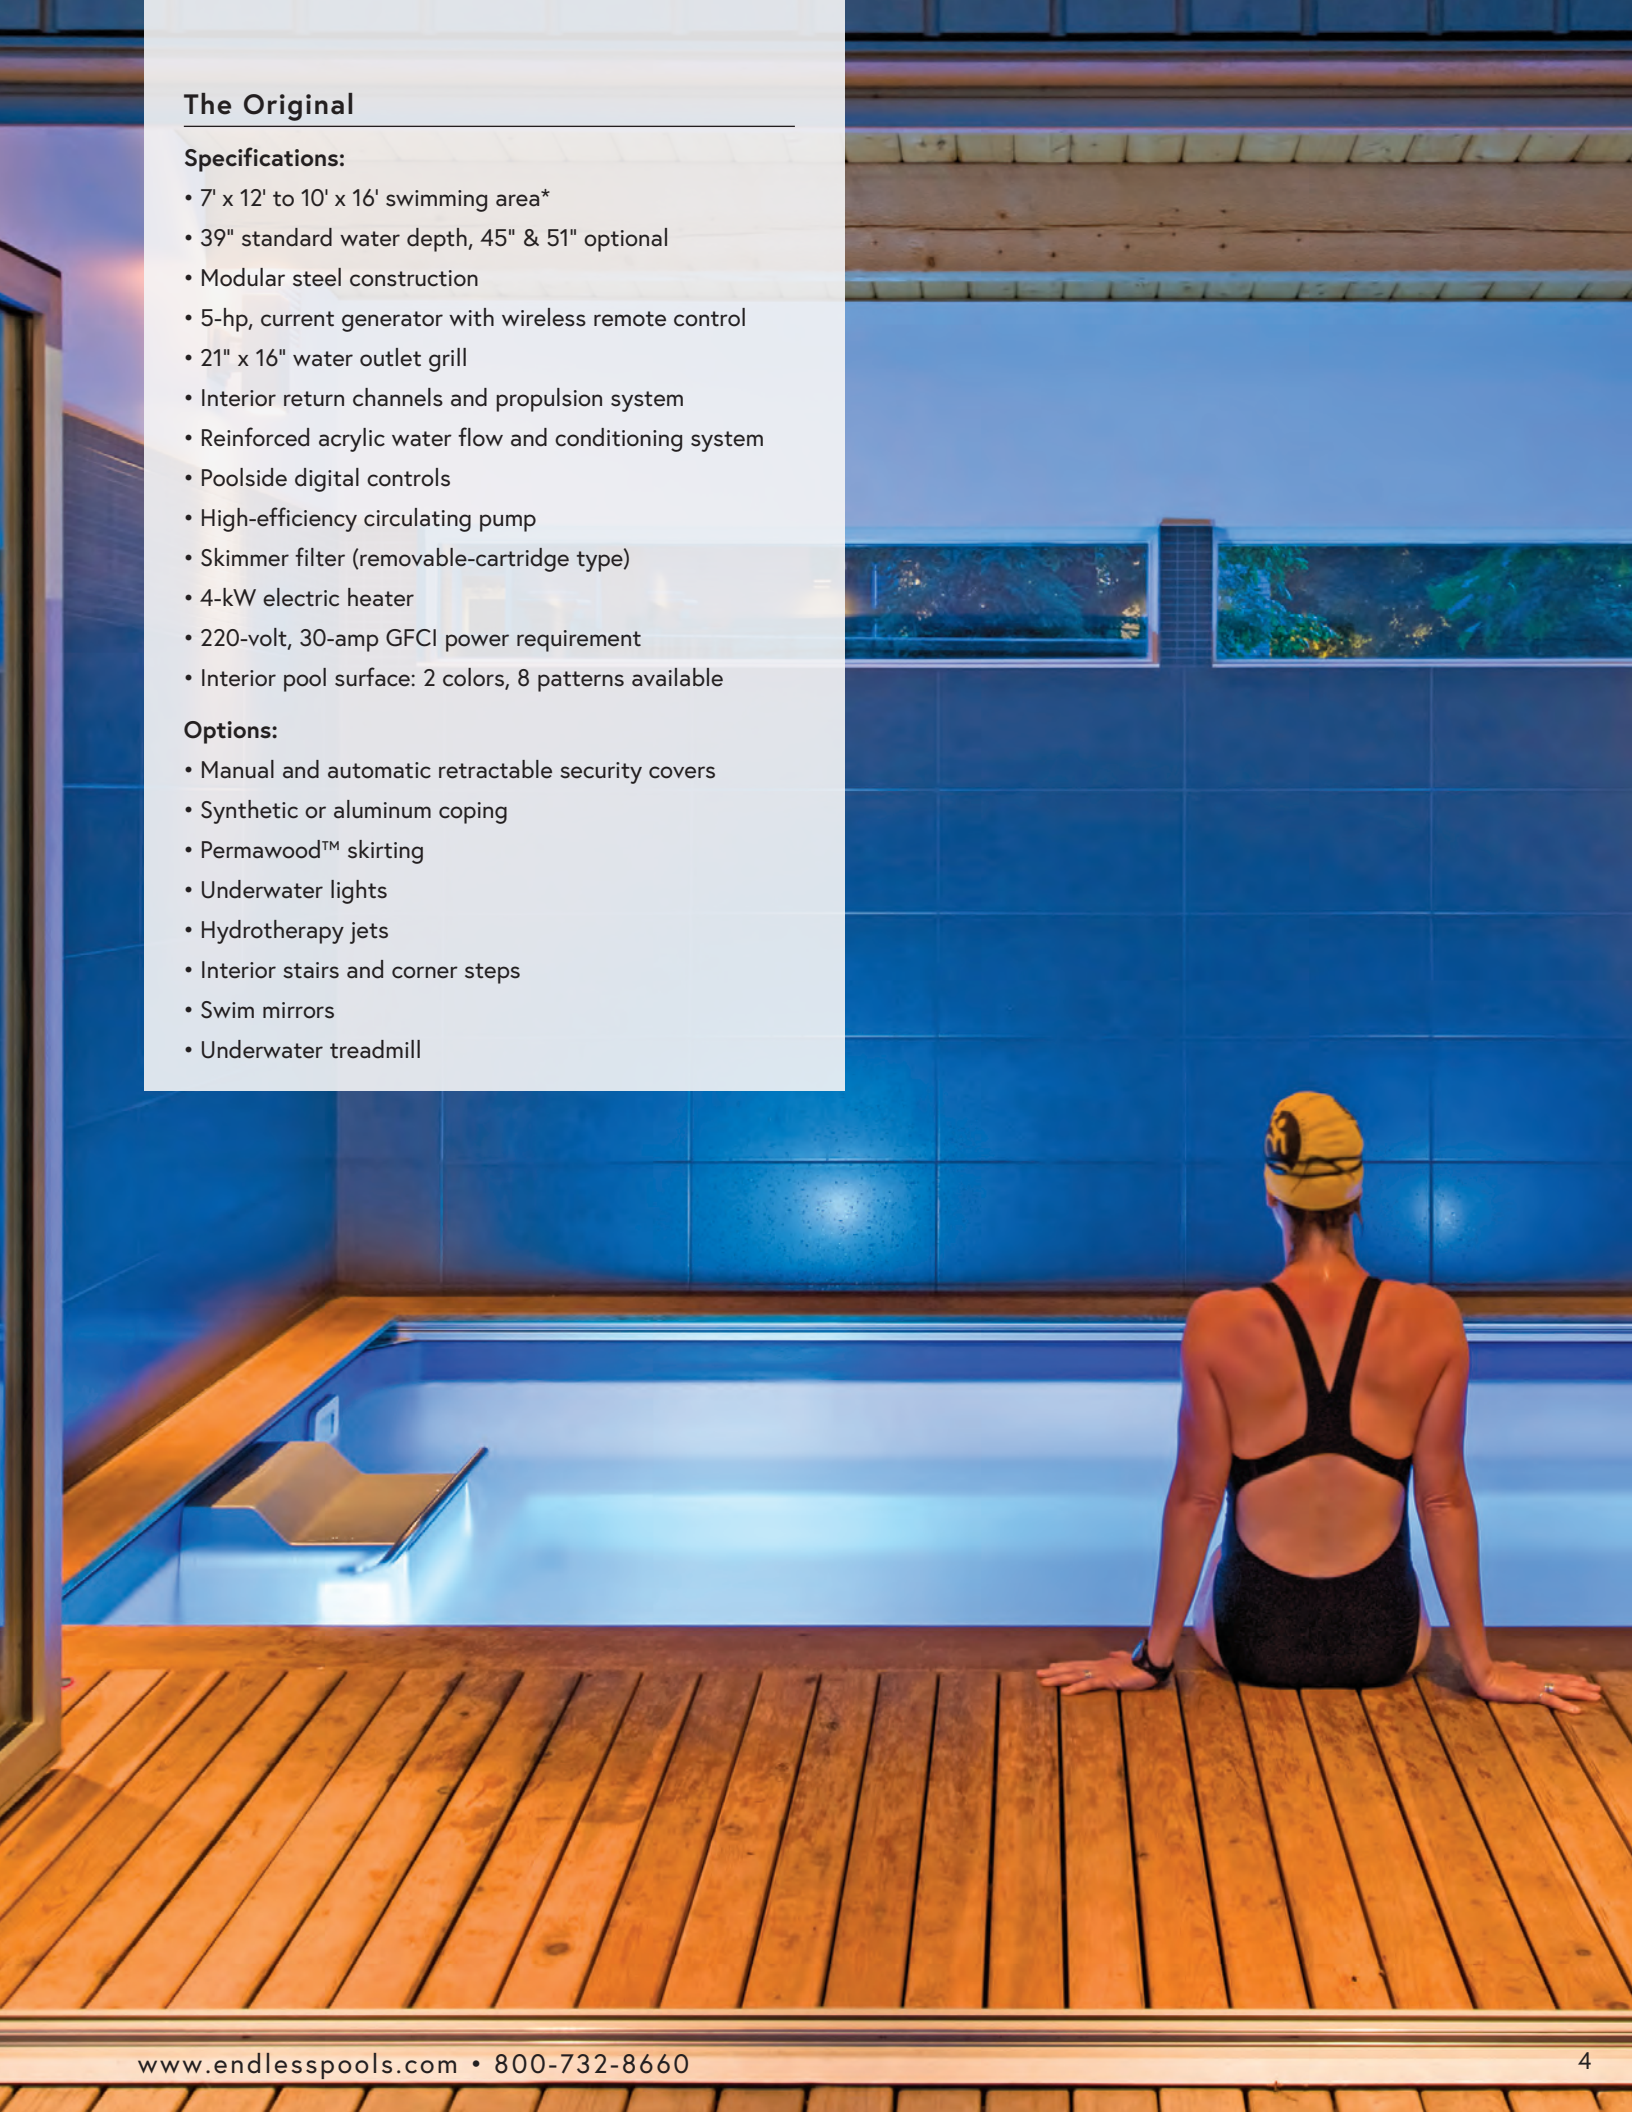

The Original

Specifications:

- 7' x 12' to 10' x 16' swimming area*
- 39" standard water depth, 45" & 51" optional
- Modular steel construction
- 5-hp, current generator with wireless remote control
- 21" x 16" water outlet grill
- Interior return channels and propulsion system
- Reinforced acrylic water flow and conditioning system
- Poolside digital controls
- High-efficiency circulating pump
- Skimmer filter (removable-cartridge type)
- 4-kW electric heater
- 220-volt, 30-amp GFCI power requirement
- Interior pool surface: 2 colors, 8 patterns available

Options:

- Manual and automatic retractable security covers
- Synthetic or aluminum coping
- Permawood™ skirting
- Underwater lights
- Hydrotherapy jets
- Interior stairs and corner steps
- Swim mirrors
- Underwater treadmill

THE PERFORMANCE POOL

Step up to a smoother, more versatile current.

Our Performance current is both smoother and, at its top speed, faster than our Original model's current. The custom-designed two-propeller system delivers a superior swim current.

It's larger. The system moves more water, requiring a 24"x18" outlet grill – that's almost 30% larger than in our Original model! The broader, deeper current gives beginners more room to drift.

It's faster (or not). Power it up to its demanding top speed of 1:05/100 yards, or at the push of a button, slow the current down to a gentle pace.

It's smoother. Many swimmers even call it "soft." We can get technical about the propellers' counter-rotation and how interior turning vanes calm turbulence, but it all comes down to this – the current just feels better!

A significant step up from our Original current, the Performance pool offers greater versatility for all.

Whether you're a strong swimmer or a novice, this pool adapts to where you are now ... and delivers an ideal environment in which to grow your skills and your fitness level.

A larger current for greater resistance

Performance Pool

The Performance pool includes all of the standard features of an Original model.

Our Performance Endless pool also boasts:

- 5-hp, two-propeller current generator with wireless remote control
- 24" x 18" water outlet grill - almost 30% larger

All of the same options are available as for the Original model (see page 4).

THE ELITE POOL

When only the best will do.

What makes the Elite pool so revolutionary? It starts with the construction. A 7.5-hp motor drives two custom-designed propellers, moving more than double the water volume of our powerful Original current system. The propellers' greater distance from the outlet grill (itself a spacious 24" x 18") gives the current more time to straighten, so you enjoy an ultra-smooth swim, at speeds up to :51/100-yards.

This is the stroke-training pool that's installed on the decks of University of Michigan, USC, Auburn, Penn State, and SwimMAC Carolina. Now it's available for residential installation.

Turbulence-free power, high-volume precision ... that's what makes the Elite pool the choice for top-tier coaches, for great swimmers, and for swimmers who aspire to greatness.

Better Your Personal Best. Call today.
800-732-8660

The perfect coaching pool

Elite Pool

The Elite pool includes all of the standard features of an Original model.

Our best current is made possible with these upgrades:

- 7.5-hp, two-motor, side-mounted, two-propeller current generator with wireless remote control
- 24" x 18" water outlet grill
- Three 59" x 18" stainless steel VGB compliant suction grills
- 220-volt, 50-amp GFCI power requirement
- 8' and 10' widths*

All of the same options are available as for the Original model (see page 4).

DUAL-PROPULSION POOL

For couples who want to stay fit together, and for families who want more active playtime, the Dual-Propulsion pool lets you have it all.

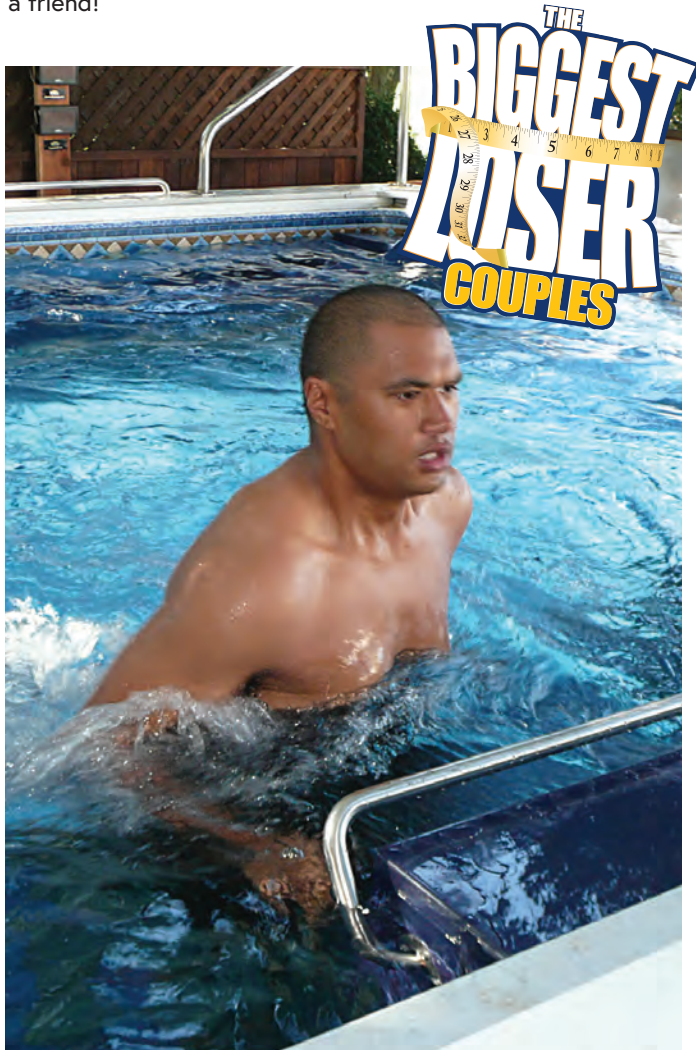

With two swim currents, you and a partner can swim or exercise at the same time, each at your own independently controlled speed. Competitive pairs can challenge each other with every swim!

Swim Together, Stay Together. Call today.

AS SEEN ON TV

NBC's hit weight-loss show, *The Biggest Loser*, used a Dual-Propulsion pool for their contestants. Complete with two hydraulically powered underwater treadmills, the adjustable-speed current delivered a progressively challenging, low-impact workout.

With two stations for side-by-side exercise, the Dual-Propulsion pool delivers the fun and camaraderie of getting fit with a friend!

A swimming machine made for two

Dual-Propulsion Pool

Specifications:

- 13' x 14' to 16' x 16' swimming area*
- 39" standard water depth, 45" & 51" optional
- Modular steel construction
- Two 5-hp current generators with wireless remote controls
- 21" x 16" water outlet grills
- Reinforced acrylic water flow and conditioning system
- Poolside digital controls
- High-efficiency circulating pump
- Skimmer filter (removable-cartridge type)
- 4-kW electric heater
- Two 220-volt, 30-amp GFCI power supplies required

Options:

- Manual and automatic retractable security covers
- Synthetic or aluminum coping
- PermaWood™ skirting
- Underwater lights
- Hydrotherapy jets
- Full-depth stairs, corner steps
- Swim mirrors
- Underwater treadmill

WATERWELL® POOL

If you need the buoyancy of water for exercise or therapy, why should you have to endure long drives to the pool, crowds, the smell of heavy chlorine, and cold water?

The WaterWell pool is designed specifically to bring the benefits of aquatic fitness into your home. It features:

- An interior bench/workout station
- Full temperature control
- A low-chlorine water-quality system
- Sizing adjustable to provide waist- or chest-deep water
- Hydrotherapy jets (optional)
- An underwater treadmill for low-impact walking, jogging, or running (optional)

A versatile therapy pool for a range of ailments, the WaterWell pool has the reliable construction of an Original Series pool without the swim current. With the same modular design, the WaterWell pool fits almost anywhere, indoors or out, even in existing spaces.

To lose weight, relieve chronic pain and muscle spasms, improve flexibility, and build strength without stressing joints, the WaterWell pool gives you year-round, at-home convenience.

Treat yourself at home. Call today.

 - skimmer
 - electric heater/controller
 - cartridge type filter
 - copper/silver ionization system
- Interior pool surface: 2 colors, 8 patterns available
- Interior bench seat
- Interior steps

Options:

- Manual and automatic retractable security covers
- Underwater treadmill
- Synthetic or aluminum coping
- Permawood™ skirting
- Underwater lights
- Hydrotherapy jets
- Interior stairs and corner steps

OUR ALL-IN-ONE ENDLESS POOL

The Streamline pool is our most affordable, all-in-one swimming pool. With the Streamline pool, you'll get Endless Pools quality in one complete package.

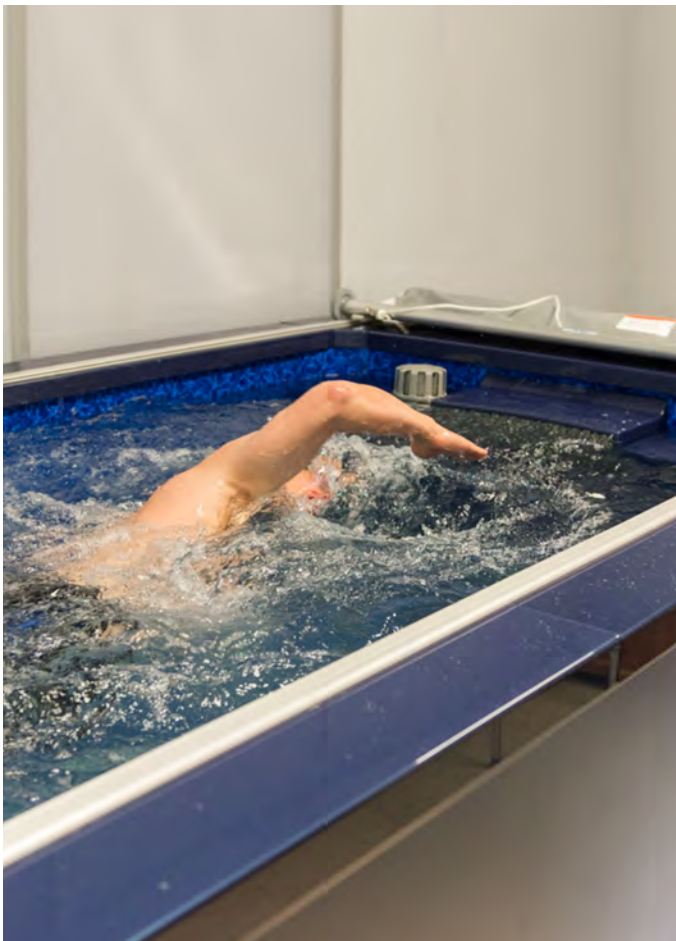

Our most compact pool, the Streamline pool conveniently installs above-ground outdoors or in existing rooms. Imagine turning your backyard, garage, basement, or any ground-floor room into your own private oasis for swimming, fitness, and fun!

The Streamline pool features a custom-engineered, airless swim current – smooth, swimmable, and far superior to competing jetted systems. With a lower top speed than our signature, industry-best swim current, it's perfectly paced for the recreational freestyle, breaststroke, and backstroke swimmer.

The pool's simplified, freestanding design allows for the fastest installation of any Endless Pools model, so you'll be swimming and playing even sooner.

The Streamline pool is available for an affordable, all-inclusive price.

***For complete information, call today.
800-732-8660***

Built-In Seating

- Outside: 6' 3" x 13' 11" x 48.5"
- Swim area: 5' x 11' x 45"
- 1,400-gallon capacity
- Power Req.: 220-volt 30-amp, GFCI
- Warranty (10-year structural, 2-year parts)

THE FASTLANE SERIES

The Fastlane series puts a smooth, adjustable swim current in any traditional backyard pool.

Without the Fastlane current system, attempting to swim in a traditional pool is frustrating. Flip-turns impede your exercise, endurance training, and even the simple enjoyment of a swimming rhythm.

With the Fastlane current system, your pool – be it kidney-shaped, freeform, or Grecian – transforms into an oasis of family fitness and fun. The current is smooth, adjustable, and generously sized.

With deck- and wall-mount options, the Fastlane Pro current system securely anchors to new and existing pools. The fully adjustable current suits all levels of swimmers, from beginners to competitive athletes. Simply adjust the speed with the water-resistant remote or the Endless Pools Fit@Home® app.

For swimming, fitness, or just a new twist to your next round of Marco Polo, let the Fastlane current system bring new-school functionality to your old-school pool.

Make the ordinary extraordinary. Call today.
800-732-8660

Fun for the entire family

Fastlane® Pro Specifications:

- 39" water depth required
- 2008 VGB Compliant
- 240-volt, 30-amp GFCI power required
- Available in platinum or sapphire
- 5-hp current generator
- Propeller-generated current
- Acrylic and 316L stainless steel construction
- Top speed of 1:08/100 yards
- Controllable with our water-resistant remote or from your WiFi-enabled device

UNDERWATER TREADMILLS

Our Underwater Treadmill turns any pool into a versatile home gym.

Available for most Endless Pools models, the Underwater Treadmill lets you walk, jog, or run in water's low-impact environment. Turn on the Endless Pools® swim current for added resistance to develop your core conditioning. Both the treadmill and the current have adjustable speeds to let you tailor and progress your workouts.

For traditional pools, the same innovative technology is available as the Endless Pools Hydrostride™ underwater treadmill. Combine it with the Fastlane Pro current system to promote core conditioning and for a convenient grab bar.

All models feature a spacious 20" wide belt. With its 5-hp motor, it reaches a top speed of 5.5 mph. The handy, water-resistant remote lets you control the power and the speed or use the Endless Pools Fit@Home® app.

Maximize the potential of your pool. Ask your Design Representative about including an Endless Pools Underwater Treadmill.

WHY UNDERWATER?

Research shows that, compared to land-based treadmills, underwater treadmills let you:

- Burn more calories.
- Enjoy an increased range of motion.
- Suffer less muscle soreness and joint impact.
- Start rehabilitation exercises earlier so you can recover sooner.

And those rehab exercises can greatly benefit people who are unable to exercise on land, be it due to injury, surgery, arthritis, or other medical conditions.

Take a step in the right direction. Call today.

800-732-8660

Recover faster

Treadmill Case Study
Olympic Champions Alistair and Jonathan Brownlee

From an Achilles tendon tear in February to Olympic Gold in August – that's the road British triathlete Alistair Brownlee traveled in 2012. And much of that ground was trod on the Endless Pools® underwater treadmill!

"When I tore my Achilles, I thought 'I'm going to have to do something special to get myself in shape as quickly as I can,'" said Brownlee, the world's premier triathlete.

"As soon as I started using the Endless Pools [treadmill], my Achilles stopped getting stiff. That was a massive, massive benefit," recalled Brownlee. "The pool made a huge difference."

When it came time to race – just six months from his grave injury – Brownlee captured an early lead and never looked back.

In 2016, both brothers went from injuries to the top of the Rio's Olympic podium. Alistair had ankle surgery just nine months prior. His brother, Jonny, who'd taken the bronze in London 2012, was recovering from a stress fracture in his left femur. The injuries struck at critical times, putting their Olympic qualification at risk.

Again, they dipped into their Endless Pools model for rehabilitation and for training that wouldn't have been possible otherwise.

Brownlees celebrate at the 2012 Olympics.

CHOOSE YOUR MODEL

Our all-in-one systems for fitness and hydromassage gives you the utmost versatility for at-home wellness and recreation.

All E-Series models feature Hydromassage Jets, integrated grab bars, UVC and CD ozone purification, LED lighting, illuminated waterfalls, 14-gauge steel frame with ABS base pan and 4kW heater.

E2000: 20' Endless Pools Fitness System in Alpine White

ENDLESS POOLS FITNESS SYSTEMS

E2000: 20' Endless Pools Fitness System

Separate spa and fitness areas enable your family to enjoy up to 34 hydromassage jets at a luxurious 104° while swimming or exercising at a comfortable 84°.

E700: 17' Endless Pools Fitness System

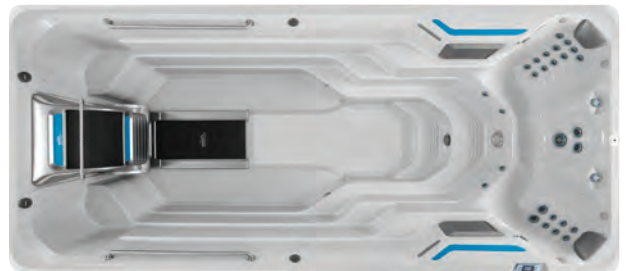

Boasting the largest swim area of any of our models, the 17' model satisfies serious (and tall) swimmers who want to enjoy a post-workout hydromassage with 27 jets.

MAKE ANY ROOM YOUR POOL ROOM

It's the most site-friendly pool on the market. With our Original Series' modular design, all parts fit through doorways and down stairs. The installation possibilities are as 'endless' as our swim current!

You can install an Endless Pools model in a space as small as 9' x 15'. Our WaterWell pool has a footprint as small as 8' x 9'!

The option for a corner installation gives you even more flexibility. Our low-chlorine water purification keeps the smallest pool rooms smelling fresh, while our secure cover options make controlling humidity a breeze!

Getting started is easy: just choose your location, select your pool, and we'll build it to your specifications.

SUNROOM

Bathe your pool in natural light for an al fresco feel while still in the safety of your home. During snowfall or by moonlight, the warm water of your Endless Pools model feels even more welcoming!

BASEMENT

This surprising location is also surprisingly cost-effective, especially if you already have a concrete floor. Imagine taking a few steps down to your own private swimming grotto!

GARAGE

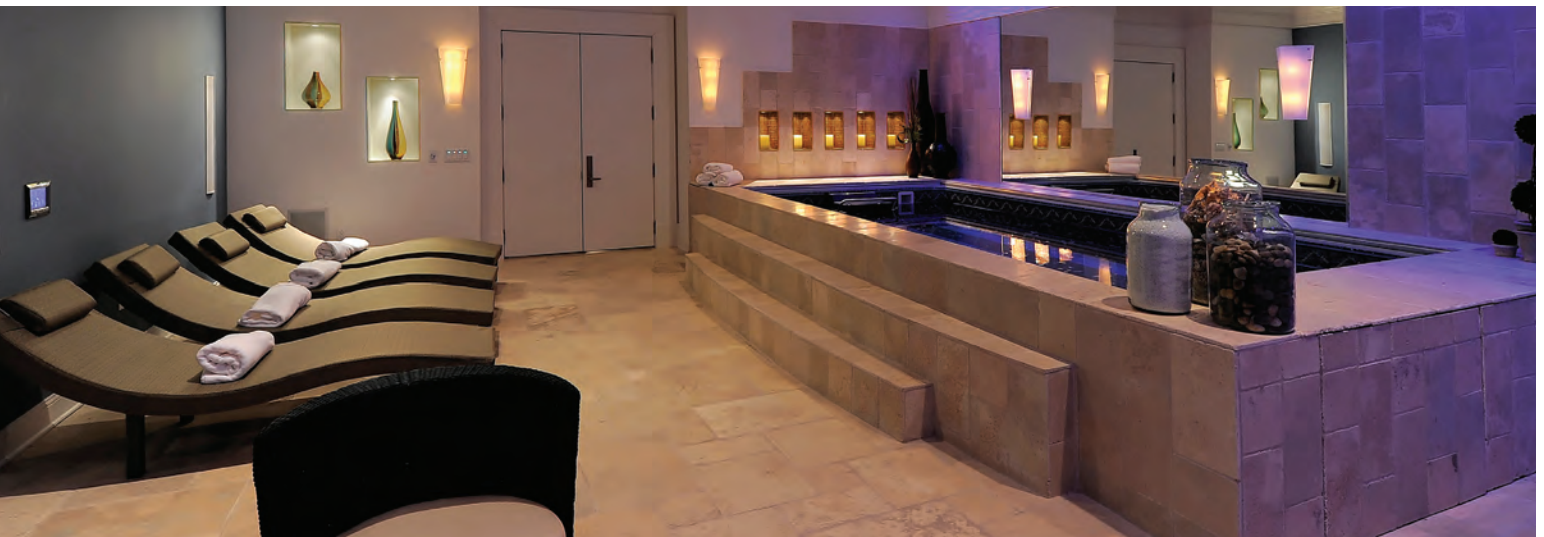

Move the lawnmower and dusty boxes aside, and you have an accessible, convenient location for your Endless Pools model. As with basements, the concrete floor makes an ideal pre-prepped site.

Existing garages

Sunroom installations

Our Pools Fit Almost Anywhere

Compact Original Series pools install easily in your backyard, patio, sunroom, basement, or garage.

AN OASIS OUTSIDE YOUR DOOR

A compact Endless Pools model can fit in almost any backyard, no matter the size.

Compared to traditional pools, Endless Pools models requires less maintenance, heats more affordably, and preserves more of your property for gardening and other recreation.

BACKYARD

The backyard pool has long been a vital part of the American Dream of homeownership. Any Endless Pools model lets you realize that dream with more versatility for swimming and exercise as well as a smaller footprint to maximize the rest of your yard.

With its compact size and the ability to super-insulate the cabinet, you can enjoy outdoor swimming in a warm, energy-efficient pool all year round – even in colder climates!

DECK/PATIO

The perfect centerpiece for a new or existing patio, our pools and spas let you create an at-home sanctuary for exercise and entertaining.

Its small footprint gives you added versatility. Build a deck around your pool to create an in-ground feel without the cost of excavation. Or recess the pool into a deck and add extra-wide coping to create poolside seating.

PLACEMENT

Adding to the flexibility of our pool, they can be installed above-ground, partially in-ground or fully in-ground.

Backyard installations

New outdoor spaces

Aboveground

Partially In-Ground

Fully In-Ground

Designed for Easy Installation

Our Original Series pools can fit virtually anywhere. The modular panel system can easily be assembled inside or out, and can be installed In-ground, Partially In-ground or Above-ground.

Our Fitness Systems are delivered pre-plumbed and pre-wired and come fully skirted with only minor assembly and electrical work to be completed.

Your first step is to think about the space in your home that could best accommodate your pool. Then give your Product Specialist a call at 800-732-8660 and together we can decide which Endless Pools product is right for you.

SWIM AT HOME™

Besides being enjoyable, swimming delivers one of the best workouts available.

- It uses more muscles than any other exercise.
- It develops strength and stamina with no harsh impact on joints or tendons.
- It provides an excellent cardiovascular workout.

With the Endless Pools current, swimming is even better!

- It's 20-30% more effective as no flip-turns are required.
- You'll swim against a current adjustable for all ability levels; as you get stronger, just push a button to make the current faster.

SEE YOUR STROKE IN REAL TIME.

Our mirrors let you monitor and improve your swimming technique. Their real-time feedback is a must for serious swimmers.

- The 2' x 3' Floor Mirror shows you your body roll and hand entry.
- Our angled Swim Mirror lets you monitor hand entry and pull-through, as well as shoulder rolls; it also helps you stay centered in the pool.
- The overhead Backstroke Mirror gives you a full-body view of this challenging stroke.

Made from polished stainless steel for safety and durability, the underwater mirrors are easily visible in the smooth, bubble-free Endless Pools swim current.

Exercise at your own pace

The No-Fear Pool

The Endless Pools environment is ideal for new and inexperienced swimmers.

It's shallow (water depth ranges from 39" to 51") so most people can stand with their head above water. For kids, the nearby seats and benches keep safety just steps away.

The adjustable current has entry-level speeds near zero. You'll get as gentle a swim as you feel comfortable with (and with experience, as challenging a swim as you can handle!).

Plus, the pool's warm water helps new swimmers to relax; it's not easy to feel confident when you're shivering!

For safety, versatility, and comfort, there's no better place to learn to swim than an Endless Pools model.

THE MIRACLE OF AQUATIC EXERCISE

For people of all ages and abilities, regular aquatic exercise has been proven to:

- Increase flexibility and strengthen muscles
- Relieve the symptoms of many medical conditions
- Improve balance and agility
- Decrease joint swelling and reduce pain
- Permit effective low-impact exercise

There are a few reasons for this. First, water's buoyancy can reduce your body weight up to 90%, which dramatically reduces tension and eliminates stress on joints and muscles. Second, water's natural resistance (enhanced with our optional swim current or jets) makes for a sufficiently challenging workout.

Lastly, water temperature can promote healing. Our temperature-controlled pools and spas can be heated to relax muscles and increase blood flow; that's especially soothing for muscle spasms, back pain, arthritis, or fibromyalgia. Cooler water often provides relief from multiple sclerosis and other ailments.

Feel better at home. Call today.
800-732-8660

Walking and Running

For many people, running — even walking — can be dauntingly painful. Our underwater treadmill allows you to exercise pain free.

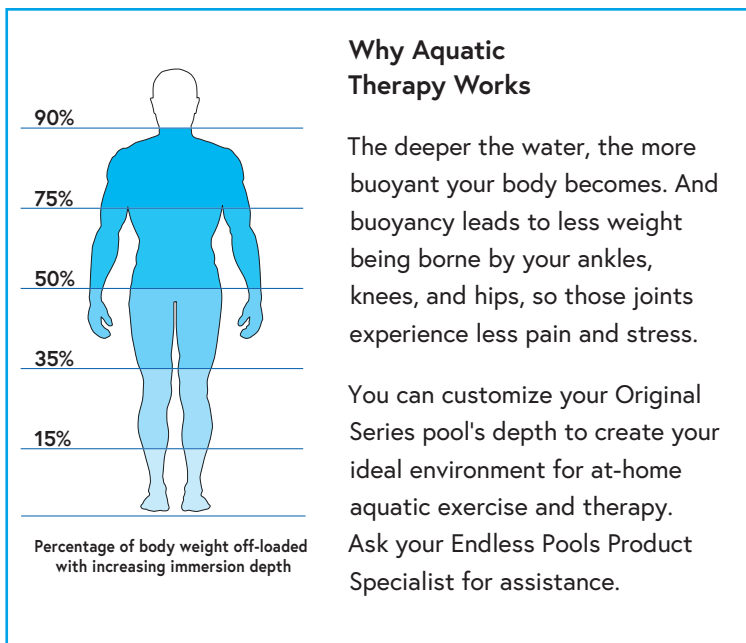

Warm Water Therapy

Warm water assists in relaxing muscles and increasing blood flow to injured areas while improving endurance and conditioning.

Adjustable Resistance

The natural resistance of water combined with our swim current will provide you with a challenging workout.

Who recommends aquatic exercise as a safe, low-impact way to gain the benefits of physical activity?

- AARP
- American Diabetes Association
- Arthritis Foundation
- American Chronic Pain Association
- Multiple Sclerosis Association of America

ENDLESS POOLS® AT A GLANCE

The world leader in counter-current swimming technology, Endless Pools has installed tens of thousands of swimming machines in more than 100 countries. We custom-build each energy-efficient Endless Pool precisely to the customer's specifications.

Endless Pools is headquartered in suburban Philadelphia, PA, with additional facilities in Vista, CA. For over 30 years, we've strived to provide the best swimming machines for you to Swim at Home.

TEAM ENDLESS POOLS

At Endless Pools, we use what we make. For heart health, weight loss, general fitness and triathlon training, we workout daily in the six models available in our Factory Showroom. Some employees even have their own Endless Pools installations. This gives us firsthand knowledge of the customer experience.
